

## **HDC Resolution for Lot Coverage Open Space Study**

WHEREAS the City of St Paul gave a presentation on Open Space requirements to the Highland District Council (HDC) on August 18, 2020, and at that time, identified the need to amend the language for clarification; and

WHEREAS the City Council passed a resolution in April of 2021 asking the Planning Commission to study lot coverage open space standards; and

WHEREAS the Planning staff presented to the Community Development Committee of the Highland District Council on June 15, 2021; and

WHEREAS the Highland District Council Board discussed this at the July 15, 2021 Board meeting and decided to send it back to the Community Development Committee to weigh in; and

WHEREAS Open Space as it pertains to private lots is defined in the Master Plan as “areas covered by landscape materials, gardens, walkways, patios, recreation facilities, or play areas”; and

WHEREAS Chapter 8: Parks and Open Space of the Ford Zoning and Public Real Master Plan will not be impacted by this study; and

WHEREAS Lot Coverage by Open Space applies to two different areas- one at ground level, and the other above; and

WHEREAS there are other regulations, design coverage, lot coverage, setbacks, Floor area ratio(FAR), and landscaping requirements that control building size, space between the buildings and total lot coverage; and

WHEREAS there is a proposal to remove the term “Open Space” from the Master Plan as it pertains to privately owned development parcels and lots and remove the definition of Green Roof Areas as Open Space; and

WHEREAS there are amendments to:

- Add the definition for “Lot Coverage” from Sec. 60.213 –L. Lot coverage. *The part or percent of the lot occupied by the above-grade portion of buildings from the Saint Paul Zoning Code to Chapter 5 entitled “ Building and Lot Terminology”*

# HIGHLAND

DISTRICT COUNCIL

1978 Ford Parkway • Saint Paul MN 55116 • 651.695.4005 • [HighlandDistrictCouncil.org](http://HighlandDistrictCouncil.org)

- Amend the Ford Master Plan’s current language for Green Roofs in Chapter 4: Zoning – Districts and General Standards and add to foot note (f) to Table 66.932. Ford District Dimensional Standards as follows:  
Lot Coverage Bonus for Green Roof Areas:  
*A building that provides Functional Green Roof Area that faces the right of way, civic areas, central storm water feature, and /or city parks as specified in the Ford Site Zoning and Public Realm Master Plan, can receive a 1% lot coverage bonus for every 1% of Functional Green Roof provided, up to a 10% lot coverage bonus.*
- Amend the definition of Green roofs to an area atop a roof surface on of a building, open to the sky and air, which is surfaced with soil and living plant materials for the purpose of retaining rainwater and absorbing heat from sunlight. The depth of substrate and planted material shall be at least two inches.; therefore

BE IT RESOLVED that the Community Development Committee (CDC) of the Highland District Council recommends supporting the addition of the definition for “Lot Coverage” from Sec. 60.213 –L. Lot coverage. *The part or percent of the lot occupied by the above-grade portion of buildings from the Saint Paul Zoning Code to Chapter 5 entitled “ Building and Lot Terminology”;* and

BE IT FURTHER RESOLVED the CDC recommends supporting the language to amending the definition of Green roofs; and

BE IT FURTHER RESOLVED the CDC supports the intent of the Green Roof lot coverage bonus, but is concerned that a 10% bonus would allow for a higher density on the lots, than what was intended in the original plan, and asks that a maximum Green Roof bonus of 5% be considered.

Approved July 20, 2021

By the Community Development Committee of the Highland District Council

**Attachment A:** Public comment on proposed amendments to proposed amendments to Open Space Lot Specific Standards for the Ford Site Zoning and Public Realm Master Plan (Ford MP)

No	Date	Name	Address	Comment
1	7/13/2021	Bruce Hoppe	531 Mt Curve Blvd	<p>Ms. Mohan,</p> <p>The following are my personal comments regarding the proposed amendments to Open Space Lot Specific Standards in the Ford Site Zoning and Public Realm Master Plan (Ford MP) and accompanying zoning text amendments to be discussed Friday, July 23, 2021 at 8:30am. I cannot attend this public hearing, thus need to submit written comments – as follows:</p> <ul style="list-style-type: none"> <li>• My family and I live at 531 Mount Curve Blvd / Ward 3 – only several blocks from the Ford site</li> <li>• Overall, the June 4, 2021, 32-page Study of Proposed Amendments to Open Space Lot Specific Standards for the Ford Site Zoning and Public Realm Master Plan (to the Planning Commission from the Comprehensive and Neighborhood Planning Committee) presented superfluous verbiage that essentially allows Ryan Companies to build-out more density on the Ford site and be permitted to reduce setbacks and “surface-level” publicly accessible open space</li> <li>• For example - revision to the definition of Functional Green Roof area on page 31 of the memo - deleting “which is surfaced” from the sentence “which is surfaced with soil” – could now allow a private concrete patio with a potted plant to count towards “open space”</li> <li>• The report of proposed amendments is filled with technical jargon and details that the average community member will not easily grasp – such as details around the measure of density (Floor to Area Ratio) and what PED and Ryan are gunning for with this amendment</li> <li>• Between the lines of your report, it appears that the City is trying to rewrite their own rules that get in the way of allowing Ryan to change the original Master Plan mandates</li> <li>• Fundamentally, my comment is to simply not rewrite or redefine the open space mandates that Ryan had to adhere to in the original Master</li> </ul>

No	Date	Name	Address	Comment
				<p>Plan – thus not allowing private balconies and rooftop gardens to count towards open space – this is just playing with the definition of “open space”</p> <ul style="list-style-type: none"> <li>• Upon reading your background, you surly understand the connection between the built environment and public health / quality of life</li> <li>• The New Urbanists paradigm seems to advocate highest density at any cost to the existing community – this high density paradigm will eventually bring diminishing returns as the quality of life factors diminishes in Highland Park. Further, as with any urban planning trend/cycle, the desire to live in high-density urban settings may shift back to single family housing stock – especially post-pandemic and as working-at-home increases. I know I can’t change St. Paul PED’s indoctrination into New Urbanist principles – but we can influence eventually using the voting booth for new Council members and new Mayor</li> <li>• The community is closely watching the moves that Ryan Companies and the PED are making that are possibly not in the best interest of the residents of Highland. Evidence continues to stack up that the City is bending the rules in favor of the developers, not the tax payer / home owner</li> <li>• The city continues to ignore its own development planning rules or makes up new ones when it suits a purpose. As more open space disappears within the Ford development, the dream that was promoted by City leaders and Ryan Companies will disappear as well</li> <li>• Subsequently, the city proposed a resolution which removes the term "open space" from the Ford Site Zoning and Public Realm Master Plan, thus almost eliminating the need for Ryan Companies, the developer, to ask for future variances on density – setting a critical precedent</li> </ul> <p>Maybe we are misinterpreting some of what is being proposed in your hard-to-decipher report. It may serve your interest to clarify to the public, in layperson’s terms, the key points/proposals and potential outcomes –</p>

No	Date	Name	Address	Comment
				<p>how about one PowerPoint slide with cause-&amp;-effect bullets? I know that Ryan Companies has a strong marketing department. You should know that there is a grassroots community group with a database of over 1000 community supporters (called Neighbors for a Livable St. Paul) that is monitoring the cadence of systematic variance requests and redefinition of laws and codes that seemingly support developers.  <a href="https://www.livablesaintpaul.com/">https://www.livablesaintpaul.com/</a></p> <p>To conclude: I'm opposed to all of the proposed Ford site zoning amendments – virtually everything in the proposed language appears to only support Ryan's ability to reduce "real" open green space and build-out to an even higher density than the original Master Plan. The Master Plan should remain intact as the guide to the Ford development.</p> <p>Sincerely,</p> <p>Bruce Hoppe – 531 Mt Curve Blvd, Highland 55116</p>

2	7/13/2021	Kate M. Hunt	2081 Highland Parkway	<p data-bbox="961 224 1980 375">Ms. Mohan, I am submitting the following response on behalf of the Neighbors for a Livable St. Paul to be incorporated into the City of St. Paul public record regarding the Ford site proposed zoning amendments.</p> <p data-bbox="961 423 1287 574">Thank you, Kate M. Hunt 2081 Highland Parkway St. Paul, MN 55116</p> <p data-bbox="961 623 1980 774">Neighbors for a Livable St. Paul (NLSP) response to the City amendments to the definition of open space lot standards for the Ford Site Zoning and Public Realm Master Plan for the 7/23/21 Planning Commission's public hearing:</p> <p data-bbox="961 781 1980 1133">The proposed amendments to the city's own definition of "open space" and lot coverage reads like Alice in Wonderland, where reality is being distorted. When confronted by NLSP about the definition of open space [through legal action using a Writ of Mandamus petition - filed on October 28, 2020], the city could not explain its own open space definitions or developer requirements. Subsequently, the city proposed a resolution which removes the term "open space" from the Ford Site Zoning and Public Realm Master Plan, thus almost eliminating the need for Ryan Companies, the developer, to ask for future variances on density.</p> <p data-bbox="961 1175 1980 1408">The city claims that the new Master Plan amendments will clarify the definitions of "open space" and building density. In our view, the 32 pages of amended language are indecipherable and further obscure any clear understanding of "open space." These amendments appear to push even more density than was allowed in the 2017 Master Zoning Plan. Yes, certainly correct the city's inconsistent definitions of open space but do</p>

No	Date	Name	Address	Comment
				not eliminate the very zoning safeguards that the city itself endorsed in 2017 to prevent unfettered building density.

3	7/13/2021	Howard J. Miller	2081 Highland Parkway	<p data-bbox="961 224 1980 378">Ms. Mohan, I am submitting the following response on behalf of the Neighbors for a Livable St. Paul to be incorporated into the City of St. Paul public record regarding the Ford site proposed zoning amendments.</p> <p data-bbox="961 423 1287 578">Thank you, Howard J. Miller 2081 Highland Parkway St. Paul, MN 55116</p> <p data-bbox="961 623 1980 972">It is very difficult to imagine completing a large-scale development like Highland Bridge without dependable measurements. St Paul set out with such measurements and zoning requirements, but they have since disappeared. An entire volume produced by PED and HRA &amp; Associates and a task force dedicated to defining open space was published in February 2011. In May, 2017 this very commission reviewed and approved a Ford Site Zoning and Public Realm Master Plan which included an exhaustive list of reliable measurements for the new development that both developer and neighbors could depend on.</p> <p data-bbox="961 1018 1980 1286">For reasons that no one seems able to offer, these measurements have been discarded. These measurements are, in fact, part of the 32-page resolution you are being asked to review and approve today. If you open the document and scroll through it you will find them redlined on many of the pages. Why were they withdrawn from the Master Plan? Both PED staff and apparently, engineers employed by the Ryan company found them confusing and difficult to work with.</p> <p data-bbox="961 1331 1980 1445">In 2011, the PED led planning commission defined open space as follows: "Open space: Natural lands, athletic fields (even if managed by non-city entity), recreational lands, community gathering spaces and recreational</p>

No	Date	Name	Address	Comment
				<p>buildings which are publicly-owned and/or publicly-accessible. The term is not intended to refer to privately-owned lands, yards, urban plazas, stormwater treatment areas or public street rights-of-way unless, through agreement, the land is designated as public space with a recreational and/or habitat function."</p> <p>A footnote on the second page of the Notice of this Public Hearings states that the exact opposite is the case. How is this possible? These are just the beginnings of the questions this group must answer. The people of St. Paul are waiting for the answers.</p> <p>Howard J. Miller</p>

6	7/19/2021	Thomas Nicosia	1264 Davern st	<p>Open spaces are very important to the neighborhood both inside the Highland Bridge property and surrounding areas within Highlands district.</p> <p>There are so many benefits for parks and open space from urban heat, trees and greenery, pollution both noise and debris not to mention having a view of open space outside an already heavily populated area (as the plan calls for).</p> <p>My concern goes further than just a green roof. That roof is not "public" space and neighbors wouldn't be able to access sitting on a bench and enjoying the few months a year we get to enjoy the outside. It would also make meeting neighbors and the normal social aspect a family friendly neighborhood provides.</p> <p>Open areas also allow for snow build up and helps provide a majestic scene during the winter months that roof tops won't provide.</p> <p>I urge you to please don't redefine the definition of "open space".</p> <p>I've been following the development for years now and hope to move there if things go as planned but if Ryan Companies keeps trying to pack more and more people in and delete greenery / open spaces I seriously doubt I'll want to move.</p>

7	7/19/2021	Ms. C. Bittner	1496 Laurel Ave	<p>To whom it may concern:</p> <p>I am writing in regards to the Highland Bridge Development and proposed changes to the language and intent of the master plan. Please stop trying to end-run agreements and intents that serve the surrounding community. Please champion the idea of a smaller, more appropriate-to-the-surrounding area, development. To a real neighborhood. Please note I said neighborhood, not City Council money-maker.</p> <p>Specifically I oppose the removal of the concept and defined term "open space" from the Highland Bridge Master Plan. The developer and the city should be held accountable to provide the defined percentage of open space for each parcel, as outlined in the Ford Master Plan. They should be accountable to all of the agreements in place. That's why they are there!!! So far it seems that whatever isn't easy for a developer or the city is either tried to be redefined, removed or given a variance from our city council. I ask that the city and planners continue forward in good faith to the agreements in place.</p> <p>I urge the planning department and the city to clarify the definition of "open space" so that it is clear exactly how "open space" is distinct from "building lot coverage." The aesthetic benefits of open space for each building parcel should positively impact the entire community and not just those who use a balcony or a roof-top deck.</p> <p>I urge the planning department not to remove the words "which is surfaced" from the definition of functional Green Roof Area. "Functional Green Roof Area shall be defined as area atop surface on a building, open to the sky and air, which is surfaced with soil and living plant materials for the purpose of retaining rainwater and absorbing heat from sunlight." Removing these words would undermine the environmental policy</p>

No	Date	Name	Address	Comment
				<p>objectives that these Functional Green Roofs are intended to serve. The whole point of a functional green roof is to be surfaced in order to have positive environmental impact. To suggest a patio or deck that is not SURFACED meets this intent is ridiculous. To try and change the wording shows that the city and planners are not working in good faith to the intent of the previously agreed language. Potted plants do not retain rainwater or absorb heat to any degree that would positively affect the area. The city and planning knew what Functional Green Roof Area entailed when it was put in the language. They need to be held to the language.</p> <p>I am ready for the planners and city to stop trying to find loop-holes and/or change things they don't happen to like just so they can make more money or make something easier. To create a community that is close, size-appropriate, and a great place to live, is worth some extra effort. Quality of life, quality of neighborhood should be just as important to the city and planners as the "of the moment" bottom line. The city should be working on our behalf, not a developer's or their own. We are the community, and they should represent us.</p> <p>Thank you for your time.</p>

8	7/19/2021	Lance Teachworth	1734 Hampshire Ave.	<p>I am concerned about the City's proposed change in the development's master plan, i.e., amending or eliminating the definition of "open space." I participated in the various community discussions about the development plan, but it seems that some of the elements of that plan that residents advocated for and were included in the Master Plan are now being "watered down" in favor of the developer's desire for greater density.</p> <p>Please retain the existing provisions in the plan regarding "open space."</p> <p>Thank you.</p>
9	7/19/2021	Elizabeth, Michelle & Dina Lenz	1817 Palace,	<p>We understand the need to make adjustments to the Master Plan, but we oppose the removal of the concept and defined term "open space" from the Highland Bridge Master Plan. The developer and the city should be held accountable to provide the defined percentage of open space for each parcel, as outlined in the Ford Master Plan.</p> <p>- We urge the planning department and the city to clarify the definition of "open space" so that it is clear exactly how "open space" is distinct from "building lot coverage." 13	7/19/2021	Kent Petterson	503 St. Clair Ave	Is this really a serious City of St. Paul Gov't policy? Removing a critical definition of Open Space from the Ford plan is foolish and an end run around good public policy. People need open space and guidance for it is critical for implementing public policy. Space that is not easily available to everyone is not open space. Shame on the city for pursuing this elimination change. This type of change is relevant for the entire city as it will give developers a new avenue to build a less livable city.

14	7/19/2021	Anne Brataas	507 Montrose Lane	<p data-bbox="961 224 1255 256">Dear Public Servants,</p> <p data-bbox="961 305 1959 410">As a 27-year resident of the Highland Park neighborhood, I strenuously oppose language changes to the Highland Bridge Master Plan that would remove the concept and the defined term of "open space."</p> <p data-bbox="961 459 1969 808">This plan was negotiated in utmost good faith by neighbors who built the value you now seek to market in this development. We, NOT YOU, administered daily care, tended and stewarded the lawns, gardens, alleys; we maintained standards of litter-free beauty, created the civic commity, friendly relationships and respect for the environment and law-abiding behaviors that make Highland Park such a desirable place to live. By altering the language of "open space" you undermine this value base and the very identity and of Highland Park. You betray the vision and meaning of this St. Paul neighborhood and our life's work to create and maintain it.</p> <p data-bbox="961 857 1980 1125">We understand the stated goal of increasing optimal Highland-quality housing opportunities for more people, and we share it. But please note: the foundation of this neighborhood is its beautiful, restful, renewing connection to nature through open spaces. Your legal and moral duty is to share the actual experience of living in Highland Park, not merely the Highland address to "look like" you've improved housing options to accommodate diversity.</p> <p data-bbox="961 1174 1980 1442">It is your legal and moral obligation to maintain the true value we Highland neighbors created for you — public servants! — and to share this value, not just the address in a cynical nod to housing equity. The way to ensure more people can enjoy a genuine Highland Park lifestyle experience in their housing — and not just have a Highland address— is to preserve the language, concept and spirit of "open space" in the master planning document.</p>

16	7/19/2021	Char Mason	695 Mount Curve Blvd.	<p>Hello-</p> <p>I would like to voice my request that the City of St. Paul Planning Department NOT remove the defined term “open space” from the Highland Bridge Master Plan. The developer and the city should be held accountable to provide the defined percentage of open space for each parcel, as outlined in the Ford Master Plan.</p> <p>We urge the planning department and the city to clarify the definition of “open space” so that it is clear exactly how “open space” is distinct from “building lot coverage.” The aesthetic benefits of open space for each building parcel should positively impact the entire community and not just those who use a balcony or a roof-top deck.</p> <p>I am deeply concerned by this change as it represents a substantial departure from the city's original master plan which was carefully crafted over a decade of community input to ease neighbor concerns about maximum high density planning.</p> <p>Please no bait and switch.</p>

No	Date	Name	Address	Comment
17	7/19/2021	Jennifer Krzmarzick	Montrose Lane	<p>Hi,  We are writing to oppose the removal of the term “open space” from the Highland Bridge Master Plan. The developer and the city should be held accountable to provide the defined percentage of open space for each parcel, as outlined in the Ford Master Plan.</p> <p>This is of great concern to us as neighbors of this development which has already affected the quality of our neighborhood and daily lives, and not in a positive way.</p> <p>Open space is key to the quality of the development and should not be the same as "building lot coverage." Open space affects the entire community and not just those who use a balcony or a roof-top deck.</p> <p>Thank you</p>
18	7/20/2021	Jan Martland	1219 Bayard Avenue	<p>To All concerned,  I am writing as a concerned citizen of St. Paul about the Ford Plant site. First off, the developer and city should be held accountable to provide the percentage of “open space” as is outlined in the Ford Master Plan. We need MORE open space NOT less that benefits everyone, not just the people who have access to a roof top deck or balcony. We need more grass, trees, flowers, landscaping in the area not less.</p> <p>The term “open space” should also be clarified so that it is clear exactly how “open space” is distinct from the “building lot coverage.” Again, more greenspace is needed, not less.</p> <p>The planning department should NOT remove the words “which is surfaced” from its definition of a functional Green Roof Area. With climate change, it is prudent to have meaningful rooftops surfaced with soil and living plant material which will help with absorbing heat and rainwater vs brick and mortar which will do neither.</p>

Please note I said neighborhood, not City Council money-maker.</p> <p>Specifically I oppose the removal of the concept and defined term "open space" from the Highland Bridge Master Plan. The developer and the city should be held accountable to provide the defined percentage of open space for each parcel, as outlined in the Ford Master Plan. They should be accountable to all of the agreements in place. That's why they are there!!! So far it seems that whatever isn't easy for a developer or the city is either tried to be redefined, removed or given a variance from our city council. I ask that the city and planners continue forward in good faith to the agreements in place.</p> <p>I urge the planning department and the city to clarify the definition of "open space" so that it is clear exactly how "open space" is distinct from "building lot coverage." The aesthetic benefits of open space for each building parcel should positively impact the entire community and not just those who use a balcony or a roof-top deck.</p> <p>I urge the planning department not to remove the words "which is surfaced" from the definition of functional Green Roof Area. "Functional Green Roof Area shall be defined as area atop surface on a building, open to the sky and air, which is surfaced with soil and living plant materials for the purpose of retaining rainwater and absorbing heat from sunlight." Removing these words would undermine the environmental policy</p>

No	Date	Name	Address	Comment
				<p>objectives that these Functional Green Roofs are intended to serve. The whole point of a functional green roof is to be surfaced in order to have positive environmental impact. To suggest a patio or deck that is not SURFACED meets this intent is ridiculous. To try and change the wording shows that the city and planners are not working in good faith to the intent of the previously agreed language. Potted plants do not retain rainwater or absorb heat to any degree that would positively affect the area. The city and planning knew what Functional Green Roof Area entailed when it was put in the language. They need to be held to the language.</p> <p>I am ready for the planners and city to stop trying to find loop-holes and/or change things they don't happen to like just so they can make more money or make something easier. To create a community that is close, size-appropriate, and a great place to live, is worth some extra effort. Quality of life, quality of neighborhood should be just as important to the city and planners as the "of the moment" bottom line. The city should be working on our behalf, not a developers or their own. We are the community, and they should represent us.</p> <p>Thank you for your time.</p> <p>Ms. C. Bittner</p>

24	7/20/2021	Mathews Hollinshead	2114 Pinehurst Ave	<p>I support the City's position on changing the definition of open space at Highland Bridge.</p> <p>1. To be walkable, development at Highland Bridge must be at pedestrian scale. Contrary to stereotype, too much open space sometimes separates access to structures to beyond pedestrian scale. In early Modernism, when the automobile was considered progress, Le Corbusier proposed a version of Paris that would have made walking impossible.</p> <p>2. Highland Bridge must be marketable, viable and successful. The new parks, both public and private, will provide ample open space. Large setbacks on development parcels cannot be affordably maintained and will not be programmed for recreation as will be the parks. Such empty percentages of development space will merely be dead space, not amenity.</p> <p>3. St. Paul taxpayers desperately need relief in the form of new taxbase. Highland Bridge, if developed properly, offers such relief. Let's not compromise that potential.</p>

29	7/20/2021	Kathryn and Ron Bennett	700 Mount Curve Boulevard	<p>To Saint Paul Planning Department</p> <p>As decades-long residents of Highland Park, we feel a strong commitment to this community. We have participated in the planning meetings over the past 10 years for the Ford Site or what is now called Highland Bridge.</p> <p>We have been dismayed by the number of variances granted to the original neighbor-approved plan to the site. Now comes another attack on the rights of the voting and tax-payer citizens of this neighborhood.</p> <p>In the April ruling the Judge commented that it is possible to conclude that the City of Saint Paul failed to perform their official duty imposed by law to enforce the Ford Site Zoning and Public Realm Master Plan. We agree.</p> <p>We strongly oppose the removal of the concept and defined term 'open space' requirement in the Highland Bridge Master Plan. The developer and city should be held accountable to provide the defined percentage of open space for each parcel, as outlined in the Ford Master Plan.</p> <p>We support the Neighbors for a Livable Saint Paul in urging the planning department of the city to clarify the definition of 'open space' so that it is clear exactly how 'open space' is distinct from 'building lot coverage.' The aesthetic benefits of open space for each building parcel should positively impact the entire community and not just those who use a balcony or a roof-top deck.</p>

34	7/22/2021	Jim Winterer	1032 Bowdoin St.	<p>To St. Paul Department of Planning and Economic Development, I am writing to express my opposition to proposed changes to the Highland Bridge Master Plan that will eliminate the concept of “open space” and instead provide a difficult-to-comprehend formula that will allow developers to increase the level of building density on this new addition to the Highland Park neighborhood.</p> <p>A stated goal of Highland Bridge was to have this development be integrated with the surrounding neighborhood. This proposed change is the latest step being taken by the city to make Highland Bridge less integrated with the neighborhood, and instead, to be more like the density found in places like New York City.</p> <p>We could see this coming right from the beginning when the developers designed the first buildings for the site in such a way that they knew, as they were designing them, that they would require a variance. They would not have done this if they didn't know for sure the city would approve a variance that would provide greater density.</p> <p>No doubt the developers were growing weary of asking for all these variances, and the way around it was to propose a new way of getting more density: put flowerpots on your roof and you get to have a bigger building.</p> <p>I have always been in favor of developing the Ford site, and I always have been disappointed in the city's ongoing efforts – through the near-automatic approval of variances and now this proposed change to the Master Plan – to increase the site's density.</p> <p>Sincerely, Jim Winterer</p>

35	7/22/2021	Harold Samtur	1036 St Paul Av	<p>To Whom It May Concern: I am appalled that the agreed upon plans for Highland Bridge, which represented a compromise involving the City, the developer and the public, have been co-opted in so many ways. The concept of changing the definition of open space is yet another example of this. One can only conclude that there never was a real intent to provide the open space presented in the plans. I entreat the City to maintain the requirements for open space originally agreed to, even as those were a compromise and, according to most public opinion, insufficient in themselves. We are being inundated citywide with highrise development. One would think that that would bring in added revenues to the City. Let's make Highland Bridge a livable community. Harold Samtur</p>

36	7/22/2021	Beth Friend	15 Orme Court	<p>Dear Ms. Mohan,</p> <p>I'm a resident of the Highland Park neighborhood in St. Paul and I'm writing you to oppose the removal of the concept and defined term "open space" from the Highland Bridge Master Plan. The City of St. Paul and the developer should be held accountable to provide the defined percentage of open space for each parcel, as it was outlined in the Ford Master Plan.</p> <p>The master plan was carefully crafted over a decade of community input to ease neighbor concerns about maximum high density planning. Why does the city then ignore those concerns and the plan details that address them? After all the time and money spent in this planning process, why unilaterally decide to remove the language that all have agreed upon? Why do St. Paulites' input seem to count for nothing?</p> <p>Open space is just that, open space -- not an apartment balcony or rooftop area. The benefits of "open space" for each building parcel should be beneficial for all the residents of Highland Bridge as well as all the residents of the greater Highland Park neighborhood.</p> <p>I urge the planning department not to remove the words "which is surfaced" from the definition of functional Green Roof Area. "Functional Green Roof Area shall be defined as area atop surface on a building, open to the sky and air, which is surfaced with soil and living plant materials for the purpose of retaining rainwater and absorbing heat from sunlight." Removing these words would undermine the environmental policy objectives that these Functional Green Roofs are intended to serve. Under the city's proposed revision, a concrete patio with a small potted plant could satisfy the definition. Why, on earth, would you remove these beneficial plans??</p>

38	7/22/2021	Teresa Fishel	2032 Norfolk Avenue	<p>Dear Ms. Mohan and members of the Planning Commission, I am writing to express my opposition to the proposed changes for the Ford Site Zoning. I am unable to attend the meeting tomorrow morning so I am sending my comments in writing. I will be brief as I am certain there are many others who have voiced similar concerns.</p> <p>While the resolution for Lot Coverage Open Space Study assures us that there are checks and balances in place that will regulate lot coverage, we have already seen that variance requests are being used to change the previously agreed upon plans for lot coverage. Unless there is a resolution to adhere to the FAR standards as they were laid out for the entire plan, I know there will be further erosion of the ground level space allocations. I am also opposed to using Green Roof Areas as lot coverage bonuses. I am not opposed to Green Roof areas, just the use of them as lot coverage bonuses.</p> <p>I would urge the Planning Commission to please take the time to listen to the community members who are affected by the changes being proposed to the Master Plan and to explain clearly why the Master Plan should not remain intact as it was written and agreed to after many years of hard work. I think continued dialog is needed with the Highland Community members to explain and justify any further changes to the Master Plan.</p> <p>Sincerely,</p> <p>Teresa Fishel</p>

46	7/23/2021	Margaret and Jon Isom	1477 Highland Parkway	<p data-bbox="963 224 1604 256">Dear Ms. Mohan and Planning Commissioners,</p> <p data-bbox="963 342 1948 451">I was unable to attend the hearing this morning, but understand you are taking comments through July 26. I am writing to express opposition to the proposed Ford Site Zoning Open Space Amendments.</p> <p data-bbox="963 540 1980 768">I am deeply troubled that the straightforward intent of open space has been dissected with what appears to be an easy bypass to increase lot coverage and floor area ratio (FAR). It feels inevitable the build will result in saturated blocks, distinctly different from a balanced environment that's been sought for years through community engagement with the city and Ryan.</p> <p data-bbox="963 857 1955 1125">While green roofs offer powerful benefits, they've unfortunately been couched as a solution to provide an open air balance, far up on rooftops only the few living there can observe. Tying green roofs to increased lot coverage further chips away at open space. And with no guarantee that the repeated variance requests for increased height and lot coverage will stop, building mass only grows beyond what was before determined as the appropriate balance.</p> <p data-bbox="963 1214 1906 1323">Lastly, the public process has been stunted by lately received and not readily available materials to get informed and contribute to the conversation at both the district council and community level.</p> <p data-bbox="963 1412 1724 1445">As a result, I ask that you table this pivotal decision until</p>

47	7/23/2021	Steve Sikora	173 Montrose Place	<p>Hello,</p> <p>As a 27 year resident of St. Paul I am writing to express my dismay, profound disappointment and anger that the City of St Paul and its developer of the Ford Site continues to practice deception when it comes to the negotiated description of “open space” in the new development. I am speaking specifically about this issue, but it seems to be a pattern practiced by developers and permitted by municipalities enthusiastic about increasing the tax base over creating a livable city. Open space must be by “undeveloped” and “open and available” to the community.</p> <p>Please stop playing games.</p> <p>Steve Sikora</p>

49	7/23/2021	Edward Stephans	1865 Bayard Ave	Short and to the point, the developers look at the master plan and make their bid to Ford with those facts. At the early group meetings they divide the public into small groups to show the good things, you might call that divide and conquer. Now they want variances on open space, buildings, parking and anything to make more money. People are getting of their house now after the virus and traffic is backing up at Ford & Cleveland and others leading to the site. Quiet streets turn into busy streets and home prices ? Protect the neighborhood and the taxpayers. I watched Highland village grow for 80 years. Edward Stephans
50	7/23/2021	Carol Kist	1959 Palace Avenue	Hello, Menaka - Variants should not be a standard practice. They should have a positive impact for everyone involved. Open space of 25% should not include parking lots nor streets. We need green space to filter rainwater, which is going straight into the Mississippi River. Giving a large footprint building a green roof or deck does not benefit the entire community. It is only for the wealthiest people who live there or do business there. And I am hearing rumors of a 35 by 35 foot sign on top of one of the buildings?! This community does not want nor need a State Fair atmosphere. Thank you for your consideration. - Carol Kist

55	7/24/2021	Kate Hunt	2081 Highland Parkway,	<p>Ms. Mohan, The following is submitted as my public comment as an individual resident of Highland Park. Kate Hunt St. Paul, MN 66116</p> <hr/> <p>I ask the Planning Commission to reject the proposed resolution amending definitions of open space and building lot coverage at Highland Bridge. How does a resident of Highland Park benefit from approving this resolution? And how do St. Paul taxpayers who are subsidizing \$275 million to Ryan Companies, the developer, benefit from this resolution? The answers are as clear as the 32 pages of baffling justification for this zoning resolution. It seems that benefits to other parties are clearer. The resolution pushed by the city, which counts private property like rooftop gardens, patios, and balconies as open space and changes the definition of building lot coverage, benefits Ryan. How? It helps Ryan meet its open space requirement while boosting building density. Why is the city aggressively driving this resolution? Because it benefits too. The resolution is a blunt maneuver to squeeze even more density from the 2017 Master Plan without the city and Ryan getting involved in inconvenient public zoning debates and being subjected to public scrutiny. By changing the definitions of “open space” and building lot coverage, no taxpayer guardrails will be left to hold back unfettered development. This resolution comes right out of Alice in Wonderland where reality is warped. In this case, private property is called open but not to the public; it takes 32 pages to reinvent the commonsense understanding of open space and even the city’s own open space guidelines in unimagined ways. So now, a concrete patio with a small potted plant would apparently be open space.</p>

No	Date	Name	Address	Comment
				Here's a simple idea: Shouldn't "open space" just be the lot space where the building isn't and public is?

59	7/25/2021	Elisa Hayday	2112 Berkeley Avenue	<p data-bbox="961 224 1980 410">When I first learned that the Ford site would be redeveloped, I envisioned expanded natural green space next to the Mississippi River. The river is a national treasure, designated a national park. What a rare opportunity we had, to protect plant and animal life and to maintain the quality of life for humans who could value and share the space.</p> <p data-bbox="961 540 1980 930">Despite the City's need for revenue, I never imagined that several thousand people would be invited to move next to our national park, and that the very definition of open space would be in question. Anyone who drives down an interstate recognizes the difference between passing by strip malls and big-box stores and passing by green fields, wetlands, and trees. Excessive concrete, crowding, and traffic degrade our quality of life, property values, and public health. A balance must be maintained. If the City does not value public and natural open space---if it cannot recognize the importance of trees and wildlife to us and to future generations---the City will lose its residents to more soul-satisfying environments.</p> <p data-bbox="961 1060 1266 1125">Elisa Hayday 2112 Berkeley Avenue</p>

60	7/25/2021	Kurt and Barb Klussendorf	699 Woodlawn Avenue	<p>We need open space at the Highland Bridge development. The need to plan for and manage that resource requires a definition of “open space” and a requirement for it. Ten years was spent planning for the site, it’s look and feel and livability. We should continue to prioritize those aspects partially by managing open space.</p> <p>Open space should include areas physically accessible to the community or part of the continuous viewscape. Open space is not balconies and it is not rooftops. Those are amenities only available to the residents of those building and not to the community.</p> <p>Thank you,</p> <p>Kurt and Barb Klussendorf</p> <p>699 Woodlawn Avenue</p>

61	7/26/2021	David Elvin	1505 Eleanor Ave	<p>July 26, 2021  St. Paul Planning Commission  City Hall Annex, 25 West 4th Street, Suite 1300 Saint Paul, MN 55102  SUBJECT: Proposed Amendments to Open Space Lot Specific Standards for the Ford Site Zoning and Public Realm Master Plan</p> <p>Dear Members of the St. Paul Planning Commission:</p> <p>Thank you for the opportunity to comment on the above referenced proposed zoning amendment. I am writing to ask that the Commission slow down and table this proposed amendment so that it can be reviewed more carefully. It is important to clearly understand the changes it could make at the Ford Site so that the Commission can decide if these are consistent with the Commission's and the community's intent regarding open space.</p> <p>I attended the June presentation to the Highland District Council at which this topic was discussed. At that meeting, the open space reduction incentive for green roof area was not discussed (or at least it was not presented clearly). Staff said the proposal would have no practical effect on open space at the site; they said that open space would continue to be subject to other regulations and that the existing zoning language was duplicative.</p> <p>So I was surprised to see at the July 20 HDC meeting the new proposal, which would apparently allow more lot coverage and reduced open space in exchange for green roofs. Green roofs are important for environmental and energy conservation reasons but do not contribute meaningfully to open space at street level. Defining a green roof is also difficult.</p> <p>The proposed amendment would appear to allow more lot coverage than the Commission and the community originally agreed upon or intend. This is critical, as the amendment could set a precedent for how open space is regarded and regulated in other areas of the city outside the Ford Site Master Plan.</p> <p>I ask that you ask staff to produce clear illustrations of the visual impacts</p>

No	Date	Name	Address	Comment
				<p>that the proposed amendment could have on ground level pedestrian perceptions of open space. Please give HDC and the community the opportunity and time to understand and comment on the illustrations.</p> <p>Best regards, David Elvin</p>

62	7/26/2021	Tim Condon	1840 Montreal Avenue	<p>A couple of questions:</p> <ul style="list-style-type: none"> <li>-does affordable housing mean you need to create ghetto-like conditions? how well did that work out in New York City?</li> <li>-do ghettos start as run-down, crime-laden areas of the community? Or, are they destined to devolve that way with limited opportunities for renewal?</li> <li>-will Highland Park lift up a Ford ghetto-like development with no open space? Or, bring it down?</li> </ul> <p>-is Saint Paul simply about revenues and low cost housing? What about the quality of life of those living there? Does that matter?</p> <ul style="list-style-type: none"> <li>-do we want the Ford ghetto-like development with no open space to be a place where even lower income people go as a last resort?</li> <li>-if you have a choice between less crowded living conditions and more, where do you go?</li> </ul> <p>I realize it likely that a deal between the developer and St. Paul leadership has already been made. And, that these hearings a sham to let citizens vent and give the illusion of actual influence over what happens in their communities. What about the original plan? What was wrong with it? Does democracy matter? Or, is it simply about money.</p> <p>Please do NOT remove the definition of open space. We in the community value open space. And, we ultimately pay the price of the over-crowding that ensues without it.</p> <p>Thank you.</p>

63	7/26/2021	Renate	2231 Scheffer Ave,	<p>Dear Menaka,  I'm deeply concerned about the proposed changes in the Open Space provisions of the development. I am a resident of Highland Park, 2231 Scheffer Ave, St. Paul, and I'm watching the development with great interest and hope for a safe future for our community.  Looking at all the natural catastrophes the world experiences lately, I'm counting on the wise decision makers of the city of St.Paul regarding plenty of green space for many reasons just to name a few:</p> <p>Residents need to keep a distance outside in the park regarding the spread of viruses etc .  Looking with horror at the disaster of flooding in Europe, it is crucial to have extrem amounts of green space for water to be absorbed. Learning from them shows how losses could have been avoided with less density.  The extrem heat shows the importance of providing natural shade with trees, shrubs etc</p> <p>Thanks for using this opportunity and weighing a healthy lifestyle over financial gain</p> <p>Renate</p>
