

inspections. I regularly conduct inspections both scheduled and after complaints. After inspections I document pictures, statements and other observed findings. Gathering this information grants better accessibility for others to review and allows for potential future enforcement/adverse actions. I developed a spread sheet for tobacco licensing inclusive of flavor and price compliance/violations, youth compliance check results and an overall pass/fail list for licensed properties with tobacco licenses at the start of inspections per year to provide for more accurate tracking and generating quick reports for the administration to respond to inquiries.

5. My education and training related to tobacco products and flavored products which are prohibited in Saint Paul includes: I am the primary Inspector assigned to conduct tobacco flavor and pricing compliance checks. These requirements have included menthol products prohibited since November 1st, 2018. I am educated on what flavored products look like and have worked to hand deliver educational materials to all the retail tobacco establishments to provide further training to clerks and managers. These include educational mailings produced with a great partnership with ANSR (Association for Nonsmokers-MN). I am the primary Inspector designated to respond to complaints and questions on this topic area. I retain a wealth of knowledge of the City of Saint Paul's Legislative code 324 which relates to prohibited products. My number one priority in my job is to answer questions to assist license holders by educating them on both prior to violations and to bring their operation into compliance with ordinance so they can be successful. I move to enforcement through adverse action if education is not successful or if the violations are such that it is clear to me that the license holder is aware of the regulations but chooses not to follow them.
