Subject: RE: Electrical Permit for 928 Arkwright

OK so 938 Arkwright. I inspected the electrical service only and sent the order to Xcel energy to restore power to this property. If I remember correctly the contractor told me to just look at the service for now and they will be doing more work once power has been restored.

I have not inspected any other electrical work that may have been completed. There were a couple of attempts to purchase an electrical permit stating in the description that the home will be rewired along with a list of items to be completed. I am unaware if this work has been completed. If it has or any other electrical work has been done, it was done without permits or inspections.

Hello Mai,

I am unaware of any electrical work and also not able to find any current electrical permits for this address.

I have attached a screenshot of what is on record in Amanda for this address.

Thank you,

Hello Randy,

We have a hearing on this address on 1/3. Marcia Moermond, Legislative Hearing Officer, wants to know if the electrical permit is ready to close or is there more information you need from the contractor?
