TABLE 1: Type I Hood Requirements by Appliance Type

APPLIANCE DESCRIPTION

Size

Type I Hood^a

Light Duty

Medium Duty

Heavy Duty

Extra-Heavy Duty

Braising pan-frying skillets, electric

Chim, baking, electric and gas

Chim, roasting, electric and gas

Chim, combination, electric and gas

Chim, convection, full-size, electric and gas

Chim, convection, half-size, electric and gas

Chim, convection, half-size, electric and gas (protein cooking)

Chim, convection, electric

Chim, deck, electric and gas

Chim, deck, electric and gas

Chim, revolving rack, electric and gas

Chim, rapid cook, electric

Chim, roasting, electric and gas

Chim, roasting, electric and gas

Chim, stone hearth, gas

Range, cook-top, induction

Range, discrete element, electric (with or without oven)

Salamander, electric and gas

Braising pan-frying skillets, gas

Broiler, chain conveyor, electric

Broiler, electric, underfired

Fryer, doughnut, electric and gas

Fryer, kettle, electric and gas

Fryer, open deep-fat, electric and gas

Fryer, pressure, electric and gas

Griddle, double-sided, electric and gas

Griddle, flat, electric and gas

Oven, conveyor, gas

Range, open burner, gas (with or without oven)

Range, hot top, electric and gas

Smoker, electric and gas

Broiler, chain conveyor, gas

Broiler, electric and gas, over-fired (upright)

Broiler, gas, underfired

Grill, plancha, electric and gas

Oven, tandoor, gas

Range, wok, gas and electric

Oven, stone hearth, wood-fired or wood for flavoring

Solid fuel cooking appliances combusting a solid fuel (such as wood, charcoal, or coal) to provide all or part of the heat for the cooking process^b

a. Where recirculating systems or recirculating hoods are used, the additional heat and moisture loads generated by such appliances shall be accounted for in the HVAC system.

b. Solid fuel flavoring cooking appliances shall comply with Table 1 as if they do not combust solid fuel.
