Case Narrative

The fire department was called to the report of a fire in a dwelling. Firefighters arrived to find heavy fire conditions venting from windows on the north and east sides of the structure on the second floor. The occupant of the fire involved bedroom said he was smoking in the room and put his smoking material in a paper cup on his desk and then left the room to use the bathroom. While in the bathroom the alarms sounded and when he and other residents opened their doors on the second floor they were met with heavy black smoke conditions and evacuated the residence. Investigation revealed fire patterns and metal fatigue of the bed mattress across from the desk where the smoking material was reportedly discarded. No other ignition sources were identified in the area of fire origin.
