Subject: Ratification of Assessment (False claims and retaliation by city Inspector)(fraud buy inspector)

You don't often get email from schwartzs.honey.farm@gmail.com. [Learn why this is important](#)

Hello,

File#j251lr
assessment #258519
property address -1112 Kingsford St

City Inspector making false work orders claiming to of been @ property to clean up during the period of Oct.7th - Oct. 23rd . That the city council has proposed an assessment in the total of \$716.00

THIS is 100% FALSE! No one from the city has ever been here to clean up anything. We have been harassed by your city inspector Richard has repeatedly fined us for nothing since I sent an email to his supervisors and HR about his admitted bias towards city employees. This email was ignored by management and Richard even retaliated with a fine when we were 100% within compliance. DSI made more then 54 inspections during a 12 month period, this is harassment no other resident of St Paul has had to deal with this harassment. I have emails to prove your inspectors bias and management's refusal to do anything to stop it or even look into my complaint email. We continue to be harassed by your inspector being fined every month since completing unemployment hearings. I believe we have and continue to be harassed by your city inspector for whatever reason and demand this stop, and all assessments added to this property be DSI be removed, this would include any and all abatements, DSI admin fees, assesment fees, attorney fees, taxes, false DSI records added be removed immediately!

We demand that the repeated violation of our rights stop, and our appeal of this fraud be investigated. DSI and No Other city departments have ever been at this location for cleanup of any kind. I have Emails to prove the harassment and our attempts to make this stop. This has continued because of DSI Management and HR' officials' refusal to investigate. By ignoring our complaints, the city has allowed this inspector to harrass us and rack up large amounts of assessment fees that have been added to our property taxes using false claims and misleading photos. At the same time overlooking or ignoring other violations in our area.

Thank you,

Chris Schwartz
