St. Paul MN 55102

Leonard has a conflict on Thursday, June 11th, 2019, 9:00AM appointment. Leonard was seen in clinic today on July 9th 2019, and is experiencing pain associated with a left shoulder small full thickness tear of the distal supraspinatus rotator cuff tendon as well as an onset of medial lower leg proximal cellulitis which is inflamed and he needs adequate time to rest and recover.

It is in my medical opinion that his appointment be rescheduled to a different date in the future as he is recovering from his cellulitis symptoms and impending left shoulder surgery scheduled on July 16th, 2019.

Sincerely,

Peter J. Daly
