I need to replace the roof on our 100+ year old garage and would like to get a quote for the work. There are multiple layers of shingles plus some of the decking and joists will need replacement according to the structural engineers report (copy attached). There are other items related to the masonry walls that will be handled separately.

Generally, it is best to contact me via email, QuintinKidd at gmail.com.

Thank you for your consideration.

Quintin
