RE: More 4 A Buck

Christine,

On July 19, 2012 I inspected the above property. Again he is still in violation of conditions 2, 3, and 4. He has too many cars I stopped counting at 52. He can have a total of 49. They were again not parked in compliance with the site plan and there was no way to maneuver these cars in the lot. The same cars that have been in the lot covered by tarps were still there. Many inoperable vehicles with major parts missing.

In addition there was signage placed on the sidewalk and the area appeared in general unkempt with tall grass and weeds.
