Subject: Sound Variance

March 14, 2012

To the City of Saint Paul,

As a resident along the bluff of Prospect Boulevard, I oppose the sound variance on the dates requested by Live Nation. We are a residential neighborhood. Any sounds in a similar residential neighborhood would be considered a public nuisance and be reported. I go to bed at 9 PM and I experience quite a bit of discomfort from noise of that level. Please submit this email as public testimony at the public hearing.

Sincerely

Mark S. Thomas, M.D.
