Subject: Sound level variance application Bedlam Theatre concert series 2014

I appreciate that the Depot's plaza is being utilized for events such as this concert series. Last year Bedlam also used this space. I leave directly across Kellogg from the plaza. The noise level last year was too loud. It was intrusive to for the neighbors. I called the city last year to complain about the noise level. 85 dBA is louder than they need for the space and the size of the audience. Going to 10 PM is also too late. Bedlam's use of the space should end at 9 PM and the approved sound variance at a lower decibel. I believe that Bedlam wants to be a good neighbor and have the support of the neighborhood.
