

Dear Councilman Carter:

At the January 10th informational meeting of the Griggs Bikeway project, the Lex-Ham residents present, heard for the first time, the impact of the proposed changes to our neighborhood.

Although the project offers some benefits, there are proposed changes that negatively affect the livability of our area. I have since petitioned the residents who will be affected by these changes and have heard that several plan to attend the City Council meeting tomorrow.

Specific issues of concern are the traffic circles and modification to the stoplight at Marshall and Griggs.

We are asking for your help. Please vote to delay the final approval of this project until the end of February. Area residents deserve to hear about plans that affect the safety of our children, as well as the aesthetic and financial impact to our neighborhood. We look forward to your support.

Thank you,
Mary Perry
