Dear Amy Brendmoen

I am writing to you about the Proposed Project of a sidewalk that the city wants approve.

I wouldn't want a sidewalk as they had tried to put one when my father was alive,

There would just be another waste of money that could be used for something else.

I'm worried about the digging for the sidewalk as my house at 1675 and my neighbor at 1671 has a private sewer if there's a sidewalk put in and the sewer needs to be repaired we would have to pay for it.

Also this sidewalk the Council is Proposing will come right up to the fence were there are bushes that will be damaged by this construction.

There will not be that many people using the sidewalk, as I have a bus stop on Carpenter Ave and there's not that many people, and there's enough sidewalks around and we don't need or want one, and there's no place to put the snow in the

- 2 -

Winter, The neighbors here are all aware of this and feel the same as I do. Maybe you should ask us about this. Will there be a clause in there if Private Sewer that will be under the sidewalk that you are proposing to put in be covered by the city if it has to be dug up at anytime for replacement of the sidewalk. Also will have to maintain this, as homeowners so that's more work for us. With all of this the Property of mine has a fence, so my fence will have to be removed and bushes and Mailbox removed will you replace these at the city's expense? When will we know about these questions we've asked? Please contact me.

Thank you
Diane Patrau
