Kristina,

I came in this morning to get the video downloaded and I had a "line" image on the tv, I went to rewind and nothing worked. I called to have the tech come out to get the DVR runningsaid it was an emergency. The tech came out immediately and informed me that the DVR did not have power and I have no recording. My earliest recording is 1/10- today when he plugged the DVR in. The tech said we have no way of knowing how long it was not running due to the power. I will have an additional two emails following this one, which is the monitor images, its off my Iphone. I took a picture of the screens to show you the latest recording and the Log List. I would not lie about this, as I wouldn't want to get another violation because the surveillance cameras were not operating and are a requirement/condition on my liquor license. I truly did not know there was not power to the DVR and have no idea as to when it happened. I don't look at the camera's unless there is a problem. Please call Dave with Low Voltage to verify that he actually came in today and why the DVR did not work. His number is 651-246-5555 cell and his company is 651-714-7960.

Truthfully, Nicole
