RE File #19234C  
Assessment #246001

Dear Council,

During the past many months two projects have been worked on and completed near my property on the corner of Edgcumbe and Fairview. I received notice of two assessments- one for the Randolph to Fairview project and another for the St. Paul Avenue to Edgcumbe project. I contacted then Councilman Chris Tolbert about the concurrent assessments and he and his aide reached out to assure me that the City policy would allow for only one of the assessments to be applied. I was informed that I would be assessed for the Fairview project.

I have now also received an additional assessment connected to the Edgcumbe project. As the City has determined the assessment that was charged to my property was the Fairview project, I am wondering how a cost associated to the project that was not assessed to me can be required? I thank you in advance for your consideration of this matter.

Respectfully,

Catherine Grimshaw
