Dear Sir:

This letter ^{is} being written in praise and gratitude to the St. Paul Water Department, particularly the crew Who fixed a burst water pipe in our street the night of February 26th and the entire day of February 27th.

The weather couldn't have been uglier. On Wednesday evening the serviceman came out promptly after my call, turned off the water and told us we would be without water for a while. On Thursday morning the crew worked to make the street passable and get the pipe fixed. So much digging in that awful cold! We were very impressed with the diligence and professionalism of all those men. We are grateful for this excellent service. The Water Department is now our favorite city department! Thank you!

Subject: Great service from SPRWS

Steve –

My block had a fairly significant break to the water service yesterday morning (Mon Feb 17) at Vivian and Kraft in WSP. Water was running down both Kraft and Vivian Lane. Trucks started to show up well before noon and your staff got to work. They stuck with it until around 1030-11pm when the water was once again restored. My wife called to determine if service would be restore around 930p and your staff were very helpful by letting her know the status of the work including that service would be restored shortly. I was impressed. But what really impressed me is that they came back with a dump truck to “salt” the streets to break up the ice that has now formed all over the street. You should be proud of your department. They are impressive in how they get their work done. Kudos to the Water Dept.

Kind Regards,

Eric Willems

Many thanks to staff at SPRWS:

The folks I dealt with pertaining to getting water service restored due to the cold weather freezing the pipe in the street, all did a most competent job. Everyone was pleasant, efficient and courteous.

From the person I reached on the phone to the service person who came to investigate the problem, the customer service person who scheduled a crew to come out, and the crew personnel who did the work, all were GREAT!!!

Thanks so much.

Bob Schmall

P.S. I am keeping the water running as instructed.

Dear St. Paul Regional Water Services Folks,

THANK YOU THANK YOU THANK YOU for coming out yesterday afternoon to thaw our frozen water service line from the street. Your crew was great, knowledgeable, careful (they unhooked the grounding wires from the electric service panel board and the house plumbing before energizing the buried pipe). They were just really great guys.

This is a wonderful contrast to the plumber our home-warranty company sent out, who said he didn't think there was anything he could do for the frozen line.

Many thanks!

Mr. Steve Schneider
General Manager
St. Paul Regional Water Service
1900 Rice Street
Saint Paul, MN 55113

Dear Mr. Schneider:

I am remiss in sending you this correspondence. The Golden Rule Building, located at 85 East Seventh Place, was inundated by water from a break in our neighboring building's automatic sprinkler main. As you know the entire 12,000 SF basement of the neighboring building was filled with water nearly 8' high and pouring into our building through a basement party wall. Our building's water issue was brought under control with your help and that of the St. Paul Regional Water crew and SPFD. You and your crew did an excellent job in managing an escalating problem. The damage to both buildings was mitigated because of your department's response. Please accept our gratitude and pass it on to your crew for their help in going the extra mile for us on the day and night of February 22, 2014.

With Much Appreciation,

Patricia A. Wolf, CPM RPA
President
