Subject: License Application Notification - #20080000717

To Whom It May Concern:

This is a written response to the Notification referred to above.

As a long-time resident of the West 7th community and an individual who supports area small businesses I carefully considered my initial response to the request by Chris & Rob's – and remain strongly opposed to the addition of outside seating.

The intersection of West 7th/Fort Road and Western Avenue South has one bar and two restaurant/bars. The amount of noise, the number of automobiles, and the foot traffic all argue against any change in a situation that will only serve to increase all three to the detriment of the residences, the school, and the church all of whom are within the required notification area.

I would like to suggest that the staff who recommended this variance/change come and sit on the front steps of my residence between the hours of 7 and 11:00 pm, and then re-consider their response.

Thank you,

Kathleen Corley
