Subject: Outcome Measurement and Public Reporting – RES PH 26-31
Date: Tuesday, February 3, 2026 1:09:26 PM
Attachments: [Goodwill Reentry Job Fair March 10.pdf](#)

I want to make sure the City of Saint Paul is focusing its time and resources on initiatives that demonstrably help residents improve their financial stability.

Given past [issues](#) with this office's program oversight and outcomes, I think it's reasonable for the public to understand how impact will be measured for this initiative.

Regarding [RES PH 26-31](#) (shared ownership initiative), could you clarify how success will be defined, how outcomes will be evaluated, and how results will be reported to the public?

I'm less interested in activity levels and more in measurable improvements in detailed financial outcomes, along with some understanding of impact relative to cost.

Council President, would you consider holding a public meeting where this office presents its evaluation framework, performance outcomes, and impact data? A focus on net impact and return on investment — what we are getting out compared to what we are putting in — would provide residents a clear understanding of effectiveness.

Lastly, I welcome department staff, Council members, and others at City Hall to attend an upcoming Goodwill [job fair](#). It's a second-chance hiring event connecting people with records to real jobs with Saint Paul employers — in my workforce development world, this is financial empowerment in practice: high-impact, high-ROI, poverty reduction, and long-term tax base growth. I'm happy to show anyone around. Flyer attached, share widely.
