

I am writing this letter in explanation of the missing petitions that are required to reach our 90% approval rate for the outdoor patio at 1045 Hudson Road in St. Paul. My management team made a repetitive effort throughout this past summer to acquire the signatures requested by the DSI Dept. Every home that was approached by Matt Burns and Nick Heidenreich that had someone living there was given a petition and was approved. There were in many cases though in which several of the homes were abandoned. Those homes were unable to get approval from as nobody lived in them. There were also cases in which some of the properties were rented out to families that could not speak English and also therefore we could not obtain approval from. Any of the previous cases mentioned we made a valiant effort to get approval from multiple times but were not able to as the situation did not change. There are also a few homes that nobody was reachable at the address at which point we sent out the petitions via certified mail to the home owners and we unfortunately had the same result. We are asking that this be taken into consideration so that we can appeal the non approval status of our outdoor patio permit. Thank you for your time.
