Councilman Tolbert –

Please consider supporting the Jefferson Bike Boulevard improvement projects. The Twin Cities are leaders in multi-modal transportation efforts, including public transportation alternatives, pedestrian facilities, and bike facilities - this type of project keeps that effort on track in our local neighborhood. As a resident of your district, I am a strong proponent of finding ways to continue to make our neighborhood more "liveable" in all respects. The effort to improve non-motorized transportation routes are critical to that goal.

Thank you for considering this proposal and voting in support of a healthier future for our residents.

Sincerely,

JONATHON KUSA, P.E., LEED AP
Vice President, Water Resources Practice Leader
