Hi.

I am writing to you regarding the sewer repair at our property in 2022. I will be attaching the photos in a separate email of the work done.

We believe that the amount of semi trucks that travel on our street daily has a big effect on the damage that occurred to our sewer pipe. Through Discount Plumbers, I believe they replaced 8 feet of pipe. Much of it under the public sidewalk and the public boulevard. And, of course, they had to dig into our property to work on the issue. I would like to know if we are liable to pay the amount of \$7560.00 when, in reality, the damage occurred under city property connected to our house, and we were the recipients of the backed up sewer. There is only one tree in the front of our house and it is on city property; not ours.

My husband and I are 65 and 64 and on social security disability. Please advise what has to occur if we believe we should not have to pay this.

Kind regards,

Thank You.
