Hello Barb,

Thank you for the response.

Based on this we would then like to request to add additional dates of July 6 – 17.

Regards,

Chris Peterson

Hello Chris,

Thank you for the email. I would suggest requesting the dates you may need for completing the work, including additional date(s) with the Sound Level Variance (SLV) application. There are Property Owner Notification requirements, with a minimum of a fifteen (15) day response period for comments, questions, and/or objections before the matter can be placed on a City Council Public Hearing. The City Council votes on each SLV application and the information voted on becomes part of the public record.

Thank you,

Barb

Hello Grace,

Our dates would be June 29 – July 10 based on our schedule, with no work scheduled on July 4 or 5.

If we finish early or in the unlikely event would need to go longer, do we need to communicate that or am I better off requesting additional dates in the following week?

Good morning, Mr. Peterson.

To appropriately process your application for a Sound Level Variance for the District Energy Boiler Testing specific dates are required.
It would be advantageous to provide exact dates as soon as possible. – you can do so by responding to this email when ready.

Thank you.
