### Sound Level Variance Application

City of Saint Paul Noise Ordinance (Chapter 293)

**Note:** A public hearing before the Saint Paul City Council is required. Application and fee must be received no fewer than forty five (45) days prior to the public hearing date that is before the requested Variance start date.

- 1. Organization/person seeking variance: VISIT SAINT PAUL
- 2. Mailing Address w/zip code: 175 Kellogg Blvd West Suite 202 St. Paul MN 55107
- 3. Responsible person: Adam Johnson Title: VP of Marketing
- 4. Event Name: Red Bull Crashed Ice Village
- 5. Telephone: 651-226-5403 E-Mail: ajohnson@VISITSAINTPAUL.COM
- 6. Date(s) during which the variance is requested: Jan 20, 2018
- 7. Noise source - Time(s) of operation: ~~4-10 pm~~ 4-11 pm  
- Time(s) of pre-event sound check: \_\_\_\_\_
- 8. Address or legal description of Noise source: \_\_\_\_\_

9. Sound level requested: \_\_\_\_\_

10. Briefly describe the noise source and equipment involved: ON ATTACHED

11. Describe the steps that will be taken to minimize the noise levels: SHEET

12. State reason for seeking variance (E.g. music, announcements, construction, etc.): \_\_\_\_\_

13. Attach site diagram showing location of noise source(s), streets, stages, tents, etc. (If there will be amplified sound, indicate location and direction that all speakers will be facing.) Multiple locations may require more than one application.

14. Return completed Application, Site Diagram, and \$172.00 fee to: CITY OF SAINT PAUL

DEPARTMENT OF SAFETY AND INSPECTIONS  
375 JACKSON STREET, SUITE 220  
SAINT PAUL, MN 55101-1806

Signature of responsible person:

Date: 12/6/17

**7. Noise source time of operation**

4pm-11pm outdoor music at Cossetta's, Tom Reid's, Eagle Street

**8. Address or legal description of noise source:**

DJ Music under overhang in front of Cossetta's - 211 7<sup>th</sup> Street West

DJ Music outside Tom Reid's - 258 7<sup>th</sup> Street West

DJ Music outside Eagle Street/The Liffey - 174 7<sup>th</sup> Street West

**9. Sound Level Requested**

95 decibels, 50 ft from the source of all locations 4pm until 11:00pm

**10. Briefly describe the noise source and equipment involved:**

DJ stands are your basic setup at Eagle Street Grill, Cossetta's and Tom Reid's

**11. Describe the steps that will be taken to minimize the noise levels**

Red Bull and Visit Saint Paul are very cognizant of the neighbors near the event location including those in Irvine Park and Irvine Park Towers as well as residents off of Chestnut Street behind Cossetta's. Unlike previous years at this event, there will not be the large sound systems within tents. These will be smaller DJ booth setups throughout the two blocks. Production crews will have decibel readers to ensure they are staying below the 95 decibel at 50ft reading. As the organization with the name on the sound variance for the full event, Visit Saint Paul will be sure all entities are aware of sound level restrictions.

**12. Briefly state reason for seeking variance:**

We are seeking this variance in conjunction with the Red Bull Crashed Ice Championships event taking place in front of the Cathedral. West 7<sup>th</sup> will be the Crashed Ice Village for fans of the event to come to before and after the event. We are seeking the variance to play music from three locations. This is a national event that Saint Paul is the only US location to host 7 times. Red Bull is flying in nationally renowned DJs to perform at this Crashed Ice Village and it is imperative that this sound variance be considered for the experience of our visitors. The extended time is due to the fact that the event on the hill runs until 9pm and by 9:30 most of the people have made it down to the Village for the after party. An extra half hour in the street allows for it to feel like an actual after party event.

**13. Attach site diagram showing location of noise source(s), streets, stages, tents, etc. (If there will be amplified sound, indicate location and direction that all speakers will be facing.)**

Red with arrows indicate DJ locations and flow of sound.
