

I am Kathy Taylor Sharp at 2169 Iglehart. I'm calling to express my huge disappointment and statement here that I am opposed to the construction being proposed by Khabbaz Nick at Cleveland and Marshall to have the density increased in the size of the height of the proposed building. I see that the City of Saint Paul continues to erode away at the history and the historic presence of the neighborhood. These are not multi dwelling neighborhoods. These are neighborhoods of people that are raising families, small children, and what's happening by increasing density and lack of city urban planning, you really are destroying this neighborhood. And I just picked up my Highland Village and see that the city is doing these things rapidly, and to me that represents lack of planning for the future. You have no idea how that's affecting traffic at Cretin and Marshall, and no one is addressing this. There are so many accidents down there, and you're just continuing to add to that along with the Highland project.
