Subject: 291 Stinson St

Ms. Moermond

I went to the property on Friday and took pictures of the space heaters and uploaded them to the file. They were all plugged directly into the outlets, thermostat controlled and kept combustibles away from them. They stated that they were going to have a contractor look at the furnace this past weekend and hoped to have the work completed on the weekend of 11/23 and 11/24. They have been playing phone tag with Lauren Lightner about possible help. I contacted Lauren and gave her a copy of the deficiency list and she was going to see what she could do for emergency housing and help with money for repairs. I have not received any information back from Lauren at this time.
