Resolution to Support the Snelling Ave Median

Whereas the Highland District Council and Council Member Tolbert's office have received multiple calls concerning pedestrian safety on Snelling Ave, and;

Whereas on November 30, 2015 the Highland District Council's Transportation Committee invited over 300 neighbors and property owners along Snelling Ave to a Community discussion with staff from the St Paul Public Works Department, with the intent of finding out if business and residents are interested in a Snelling Ave median, and;

Whereas the majority of the people in attendance at the Community input meeting supported an 8 foot median on Snelling Ave if it: maintains parking on at least one side of the street, provides the opportunity for additional parking mitigation, and does not extend south of Highland Pkwy, therefore;

Be it resolved, that the Highland District Council supports the City of St Paul's Public Works department, working with the Community, to create a design for a Snelling Ave median between Highland Parkway and Randolph Ave.

Adopted on January 7, 2016

By the Highland District Council Board of Directors

Resolution 2015-29T
