RE: Proposed new Auto Repair Garage 290 Larch St.

To whom it may concern:

In regard to the proposed new Auto Repair Garage on 290 Larch St., I have concerns/issues about street parking. Although there is wording to the effect of no parking of all types on public streets by the business, there has been issues in the past with other similar businesses with vehicles, trailers & other equipment parked along Larch Street to Galtier Street. Thru-traffic, including emergency vehicles, has been impeded with vehicles parked in these areas and our yard has even been used as a thoroughfare due to the obstructions. I have tried to get these matters resolved over the years but to no avail. I am just hoping my thought & concerns will go on record as to eliminate problems in the future.

I feel a site visit with a company representative or myself would be beneficial to all parties.

Please feel free to contact me with any questions.

Sincerely,

Mike Frascione
