

CITY OF SAINT PAUL
INTERDEPARTMENTAL MEMORANDUM

DATE: 02/14/11
TO: Christine Rozek
FROM: Bill Gunther *[Signature]*
RE: Hampden Park Coop
928 Raymond Ave
Inspection Number: 10 937924
Inspection Date: 01/26/11

REQUEST FOR LICENSE ADVERSE ACTION

The Environmental Health Division conducted a re-inspection of the facility at 928 Raymond Ave on 01/26/11 and is recommending license adverse action (Section 331A.11 of the Saint Paul Legislative Code). The food code violations listed below were noted as being uncorrected during the inspection. A copy of the full inspection report is attached.

The following penalties are being recommended:

Location: WALK-IN COOLER -

Violation 1 Severity: CRITICAL (Major) Comply By: 12/19/10 Notice # 2

RECOMMENDED PENALTY: \$175

The mechanical refrigeration equipment is holding potentially hazardous food at temperatures over 41 degrees Fahrenheit. THE WALK-IN COOLER IS RUNNING WARM. COMMERCIALY PREPARED CHILI GARLIC PASTE WAS 43F. SOUP TEMPERATURES RANGED FROM 45F-55F.

Provide adequate, approved mechanical refrigeration to maintain cold potentially hazardous foods at 41 degrees Fahrenheit except during preparation, cooking or cooling. (MN 4626.0395)

The penalties listed above were based on the food code penalty guideline and the following mitigating or aggravating factors:

Potential for harm or imminent threat to public health:

Improper food holding temperatures are a major cause of foodborne illnesses.

Extent of deviation from statutory or regulatory requirements:

The soup temperatures varied but the upper end of 55 F is significantly high to cause a major foodborne illness outbreak.

Demonstration of good faith efforts to correct a violation:

Although there was no indication that there was any attempt to correct the problem between the first and second inspections, eventually they did correct the problem.
