Hi, my name is Katherine Brick from 2154 Hartford Ave. commenting on the public improvement construction project that we were notified about. I would like to object to the method of funding for the mill and overlay project because we are already paying property taxes and this is an additional amount that does not necessarily contribute to benefits in our home or property and should be expected to be paid for by our existing property taxes or funds by the city. I know there is litigation involved with this that has occurred and is likely to continue to occur and wanted to state my objection. Thank you. Bye, yeah.
