

St. Paul City Council Members:

Although it is a late date, I urge you to reconsider the repurpose of the Gillette building with the new Saint ball park. Two points that I appreciate with the repurpose plan is that 500 parking space would be in the lower level and that the Gillette building would be an effective sound barrier for the lower town area. Not everyone wishes to hear the crowds at the park events,

My wife and I live in Hugo, but we have a daughter in the Parkside apts. I don't need to tell you, but at the best of times, parking is difficult. We used to enjoy going to the farmers market, but we have stopped going there because parking was such a problem.

The current stadium plan is good, but with the Gillette building repurposed, it could be great!

Thank you for your consideration.
