Staff Comments

Public Works staff confirmed with the route driver that there was only one cart on site, even though the PO was being billed for two carts. The PO is unsure when the second cart went missing but noted it had been missing "a while." PO was charged for 58 extra bags in the quarter and also charged for second nonexistent 64-gallon cart. By applying the capacity of the missing cart (5 bags per week) to the overage, the bag count is reduced to 11. Staff recommends reducing bill to \$311.33

Internal note

PO upset that he was charged 87 bags in Q4 and 58 bags in Q3, and is aware there are currently 29 bags in Q1 2026

PO also states they only had one cart, and would like to be reimbursed for the second cart. Does not know when the second cart went missing. Told PO I will connect with my supervisor to determine how to proceed, and to also talk to the route driver about the extra bag charges. I will call him next week

PO also requested new lid on recycling cart and to have a second recycling cart delivered. Set up jobs for those.

Internal note

Need to bring this to a hearing. Will suggest reducing bags from 58 to 11. Confirmed with route driver that there has only been one cart since he started driving that route in Sept/Oct.

PO was paying for 64 gallon cart and 96 gallon cart in Q3, but 64 gallon cart went missing

Q3 Bag Count: 58

Hi Antonio

Here is a quick summary of our call. I am recommending we take the extra bag charges to a legislative hearing on Thursday March 19. We will call you sometime in the morning between 10am and 11am.

I spoke to the route driver this morning and he confirmed that you only had one 96-gallon cart on-site for all of Quarter 4 and part of Quarter 3. Since he started this route midway through Q3, he cannot confirm the status prior to his start date; however, he did verify that the second cart had been absent since he started the route until it was replaced last week.

Because you were being billed for a 64-gallon cart and a 96-gallon cart in Quarter 3, we need to adjust the bill. A medium 64 gallon cart holds about 5 regular kitchen sized bags each week. I will recommend adjusting the bag count by 5 bags each week. Using this logic means the current Quarter 3 bag count of 58 bags would be reduced to 11 extra bag charges instead.

The Hearing Officer will make the ultimate determination of if there will be an adjustment and how much to adjust the bill. The logic used to reduce the Quarter 3 bill will also be used to adjust your Quarter 4 and Quarter 1 bill. We do not need to do a legislative hearing for these quarters.

Let me know if you have any questions.

Thank you,

Jillian
