

796 Agate St
St Paul MN 55117
File # 19138
Assessment # 135202
9/16/13

To: Saint Paul City Council
Ratification of Assessment

To Whom ever this May Concern:
I did not Ask for these problems!
I received a Notice about Hatch/Agate
Area RSV P (2013) project.

There were two billing send to me",
One for \$1800.00, Street and Lighting project
and the Re-doing of the Sewer project
Twin home / Split in the amount of \$1300.00
I was call and told they would go
into 10 feet of my property and they went
as far as "30" feet into my property
for the pipes." (My Driveway)

The next thing I know; I received a
Call from the Department, the City of
St Paul, A. Lisa I spoke to, stated to
me, "we going in to split the pipes (twin home)
and individual piping and you will have
new pipe and a complete new driveway
for free!"

I repeated what she said by question
her and she said "yes" for free!
I didn't understand, "Why" I wasn't
given an answer, so, it's the City,

"I Know" As least the City stand by their word, So I agree of course, who wouldn't!

A few words was said about this, I agree and she hung-up!

And for the Last Two-Months On my Half of the twin home my property, Part of my drive way torn-up and that part was pile-up with drive-way parts, or tar, dirt stack, waste even, some what now, that going in and out of my garage take me 10 to 15 ^{min} minutes to get over my Neighbor side, he's was nice and Clear Easy to Come and go, from the beginning!

My Water Hose from the City was shut Off" everyone had water but me, the hose was gone and when I walk out, water was just running in my drive-way, it wasn't turn Off, the water was very nasty from my faucet they connect it back-up after laughing.

I have spoken to Dan, Hawk, Drew, Dane, & Lisa and the other Lady over the project about the Sewer, still the smell of rotten eggs in water laundry each time I wash, ever other day for my mother.

"Nother has been done or fix" I'm afraid of Toxin will spread in my fresh water, I'm feeling it's all been a lie and a lie, My Neighbor side is just
(over)

My house was build in 1984, it's very likely is in my pipes!

The City torn a hole in the pipes (my side) and Sewer is Escaping and now I have to deal with this.

A plumber is coming this week, I will inform the City if there is a problem, I serious doubt it!

This has really put me in a stressful situation both mental as well as financial!

I didn't ask for this, the City offer me this.

By the time you received this, both payment was send in!

\$ 800
1300
3,100.00

P.S. From going in and out of my Driveway with all that pile, now my Oil basket is leading Major Oil for not smoothing my side of the driveway and took weeks between the side walk and the opening of my park driveway he fill ~~at~~ end. Oh!

But! on both side of my Neighbor their was fill in! So I had to use my Neighbor side as I mention before to get Out!
