

Ames Construction has applied for a sound level variance to allow for 24 hour per day road construction, such as, bridge demolition, bridge construction, ramp work, sound wall construction and the addition of High Occupancy Vehicle (HOV) lanes along Interstate 35E from February 20, 2014 to November 1, 2014. All bridge demolition work will occur on a weekend starting on a Friday at 10:00 PM and will be completed on or before 5:00 PM Monday. During this time period, I-35E will be closed to traffic during demolition. The demolition of two bridges (Arlington Avenue and Wheelock Parkway) is scheduled to begin on Friday, February 28, 2014. Two other bridges (Larpenteur Avenue and the Gateway Trail) are scheduled for demolition beginning Friday, May 9, 2014. Dates may change due to weather or construction delays. The Department of Safety and Inspections (DSI) is recommending that the occupants of property located within 400 feet of a bridge demolition site be notified by the contractor at least 48 hours before the start of any bridge demolition. DSI is also recommending that Ames Construction be granted up to thirty (30) overnight elevated noise shifts, for overnight work that is expected to create excessive noise. A 48 hour notice would also be required.
