VALVES AS DIRECTED IN THE  
INSTRUCTION MANUAL

A photograph of a house's exterior. The house has white horizontal siding. On the right side, there is a white door with a decorative, scalloped glass insert. To the left of the door, a black house number '869' is mounted on the wall. Below the number, there is a small utility box. To the left of the utility box is a white-framed, double-hung window with a dark frame. Above the door and window, there is a white decorative fascia. The upper part of the image shows the roofline and a portion of a neighboring house with a textured, light-colored exterior wall and a window. The overall lighting is bright, suggesting daytime.

869
