

2-20-14

(24 years)  
As a long-time resident of this nearly always quiet neighborhood, with its compact character, it's hard to know what impact Mr. Luck's plans will have.

At least there should be a clearly stated cap in decibels on the sound level of the variance.

It does seem that there are many other locations more suitable for a "noisy assembly".

Of course the Park is the place for many weddings and noise has never been an issue, likely because the receptions take place elsewhere.

Sound considerations aside, best wishes to Mr. Luck on the happy occasion.
