**Subject:** Our wonderful and respectful biking public

I received this week a "TAKE ACTION" Mailing re doing away with yet more parking on Cleveland Avenue and am absolutely disgusted to hear of these wonderful city plans.

It is hard enough to get to park near Cecil's Deli now-a-days, that this will totally stop me forgoing to this wonderful eatery in the future. It is bad enough that bikers do NOT stop for STOP SIGNS or RED LIGHTS as it is but to give up more road for them in inconceivable.

Perhaps we drivers should just sell our cars and leave the roads totally to very rude bicyclists; thereby totally doing away with the taxes derived from us car drivers. If only the biking public (who are no doubt drivers also) would adhere to the rules of the road; perhaps they could be taxed when you stop us drivers from driving???? This Senior would be house-bound if I couldn't use my car once in a while, whilst still paying taxes I may add.

PLEASE do NOT pass this legislation; it would penalize too many of us who have no other way to get to places we need to get to, or want to get to. When will the City start on closing Grand Avenue to cars????????

Sincerely,  
Scotty Thomson

Councilmember Finney,

I am an avid road biker. In just the past week I've logged over 200 miles - most on our city's streets. I have no problem finding relatively safe places to ride. It just takes some common sense and a little pre-planning. One rule of thought is to choose roads that are not "swift streets" such as Cretin and Cleveland. Because of the heavy traffic and faster speeds of cars and trucks on Cleveland, by designating Cleveland as a "Bikeway" you are going to put bikers at great risk. This just is not a good or effective use of my tax dollars - especially if it means limiting access to area businesses by eliminating parking. I've been following this issue and think I understand all sides. However, the idea that you are going to increase the patronage of a business such as Luci is ridiculous. The thought of my wife and me biking to a nice restaurant shows a grave misunderstanding of reality. And how about during inclement weather. As I said - I'm a very active bicyclist. Of 365 days in the year a large majority are not nearly "weather friendly" in the sense that I would bike to a place of business - be it Cecil's, Davanni's, Luci, Sportsman's Barbers, etc. If it's raining - or snowing or freezing - I'm not biking. And I'm certainly not riding my bike down Cleveland to head to any shop in Highland Park.

Over the years, as you have taken more and more real estate away from the car drivers, I am feeling and hearing more and elevated aggression from drivers. "Back in the day" I could go out and ride 20, 30, 40 miles around Saint Paul and Minneapolis and not hear anyone scream, "Get of my road!" or "Ride on the bike lane where you belong!" These days I'm hearing it more and more often and with greater hostility.

I'm not exactly sure of the motivation for this. However, I've been to enough City-related meetings (I am a past chair of the Business Review Council) to know that there are a number of staff in the Mayor's office who think Saint Paul should model itself after Portland, Oregon - a city with average temperatures well above those of Saint Paul - and to win "best bikable city" awards. We have enough accolades.

Let's stop stealing real estate from the drivers and fix the roads and paths that are currently designated bikeways. They are a disaster. Don't believe me? Ride with me any morning at 5:30am. I'm just back from a 26 mile route, primarily using Saint Paul streets. The East River Road is extremely dangerous to navigate and the recently designated Jefferson Bikeway, with its numerous gaping potholes, is treacherous, at best. If you and the promoters of this plan were actually bicyclists you would all understand what an implausible strategy this is and what a great misuse of taxpayer dollars all of this will continue to be.

Thank you for your consideration and for joining me in opposing the removal of parking on Cleveland Avenue - and for not spending money we don't have.

Respectfully,  
Mike

**Subject:** bike lane Cleveland Ave

Chris,

This is Dan Murray, xxxx Berkeley Ave, St Paul.

I am not in favor of Bike lanes that will remove parking on Cleveland Ave in St Paul.

I am very concerned about the "Bike Lobby" and how it seems they are "Social Engineering" our city to be more favorable to bikes than cars or businesses that have commercial interests. The businesses have been here, in many cases, for more than one generation, and yet all of a sudden are treated with less importance than bikes and bike riders.

I recommend either Finn Ave, Kenneth Ave, Prior Ave, or Fairview [already a striped bike lane] as a better dedicated bike lane. Cleveland is too skinny, too busy, and families and businesses are being ignored in favor of the social engineering of the bike lobby. Please don't vote in favor of taking away parking on Cleveland Ave, and making it an official bike lane.

I will make note of your vote, and to be honest, there are many reasons why I am not okay with what's going on in St Paul, and will vote for someone else next election if the current leadership, council and mayor, bow to the Bike Lobby. I believe the "Real Silent Majority" on this issue does not support the Bike Lobby.

Dan Murray

**Subject:** Cleveland Avenue Plan

Chris, I'm very concerned about the proposed plan for the bike lanes on Cleveland Avenue. I don't think it is a good idea. It isn't fair to so many residents, students, and businesses that need to have parking available on Cleveland.

I live in the neighborhood (on Stanford) and worked at St. Thomas until last year, so I know how important parking is along Cleveland to so many people in this area... especially since there is permit-only parking on so many side streets already.

Fairview Avenue is much safer for bikers (especially because of the street width and it has turn lanes for cars). Cleveland Avenue is rather narrow, and heavily traveled with cars, especially during rush hour times.

Please vote against this plan.

Thank you,

Susan Sonnen

**Subject:** Proposed bike lane on Cleveland Avenue

Chris,

I realize this is a last minute note but I did want to express my feelings about the proposed addition of dedicated bike lanes on Cleveland Avenue.

As someone who spent more than 10 years in the MnDOT Office of State Aid working with numerous jurisdictions within the Metro Area I had multiple

occasions to deal with this type of situation especially with regard to the concept of "complete streets". To quote to former director of our office "not all modes on all roads" is the way to think about who uses a roadway facility.

There is a need for multiple modes of transportation but that does not mean they all belong on every route. In the case of Cleveland Avenue you currently have a facility with a very large number of motor vehicles (in excess of 10,000 per day) plus mass transit. Adding dedicated bicycle lanes will only add to the congestion, it will most likely not cause a decrease in the number of motor vehicles using the corridor but it will place slow moving (bicycles) in conflict with faster moving (automobiles).

To me this does not make sense when there is a reasonable alternative in Finn Avenue. Utilizing Finn as the designated bike route allows for the separation of different speed vehicles making both bicyclists and motorists safer. The argument that Finn "does not provide a continuous route between Ford parkway and Pierce Butler" is to me a secondary concern to overall safety of all users. Directing northbound bicyclists to Finn prior to crossing Randolph and having them use that route up to the dedicated bike lanes on Summit seems a like a reasonable compromise.

Another argument I have heard is "this bike plan was studied for more than 2 years, if someone had a problem with it they should have already brought it up, it's too late to change it now." We all know that human nature dictates most people will NOT examine any sort of plan or proposal until it effects them directly. In this instance publishing a bike plan on the City website would not necessarily cause someone to think about the consequences until it directly impacted them.

Bicycles, automobiles, buses and peds can all coexist just not on every road.

Thank you for your attention.

Subject: bike lanes and small businesses

Dear Councilman Tolbert,

Please consider not eliminating the parking spots on Cleveland Avenue in favor of bike lanes. The street is already narrow, with minimal if any bicycle traffic. The small businesses that are an important part of our neighborhood rely on those limited spots for their customers and their businesses' success. There must be a better route to consider for bicycle traffic. Bikes already get plenty of preferential treatment. Please don't make it even harder for others to travel on city streets. Thanks for your consideration.

**Subject:** Proposed Cleveland Bike Lane issues

Hello,

I am writing in regards to the proposed Cleveland Ave. bike lane.

I would like this email to go on record that I don't support this proposal and would encourage you and all council members to vote against this proposed re-zoning of Cleveland Ave between Randolph and Grand to become narrower and have bike lanes.

Note that this is coming from someone who is an avid bike rider! I really feel we already have enough north / south routes that are bike friendly through this part of St. Paul (the River Road, Fairview Ave.) Also there are some good residential streets like Prior Ave. and Finn Ave., which work well to go North / South through this area.

Cleveland Ave. is already a pretty narrow street, narrower than Fairview if I'm not mistaken, and zoned for businesses, so to further narrow it and steal parking is not a good idea in my opinion.

So for these reasons, let me assert that I think the cost / benefit ratio of this proposal does not add up--it would not greatly serve to enhance the community (as I said I feel we have good bike routes in place already) and this could prove damaging to local businesses and residents nearby, where parking would spill from the more business zoned Cleveland onto nearby residential streets.

Thank you,

Respectfully,

Brian Tennessen

**Subject:** Bike Lane on Cleveland

Mr. Tolbert, et. al,

My name is Rachael Huyck and I live at xxx Cleveland Ave. South, 2 blocks north of Randolph, with my husband and two teenage sons. I want to start by saying that we LIVE here. This is our home of 20 years and we are not an occasional biker passing by. This bike lane would disrupt our home life very significantly. Like everyone else living in this neighborhood we rely on the road in front of our **home** to park. We do not have a garage, nor do many of our neighbors on Cleveland. I park in front of my home to carry in \$300 worth of groceries at least every other week to feed growing boys. We rely on having our cars parked outside of *our* window to know that they are safe and not being broken into or stolen. We live in the middle of the block. Imagine what it would be like to haul the groceries, the sporting equipment, in the dark, in the winter, etc. from 200-400 yards away; to not be able to monitor your vehicle, to have nowhere to park during snow emergencies, to ask our guests to walk to park 200-400 yards to our home. This is our quality of life and we pay a lot of taxes to live in this community. We already put up with a lot of negative aspects living on Cleveland as it is. Furthermore, our neighbors on Juliet and Palace also park in front of their own homes, so where are we suppose to park? On the corner of Palace and Cleveland there are two business (a salon and a daycare) that use Palace down to our alley for their businesses. Again, where are we to park? What if this was your home on Cleveland?

I am a biker, a hiker, a kayaker, a yogi, etc. Physical activity and environmental quality of life is important to me as well. I'm in complete support of bikers. But as a biker I can tell you, I would never choose Cleveland to bike down. **This road is already really narrow, really busy and really fast**, the buses go down Cleveland to connect through Highland Park to the light rail. The road will continue to get busier as new development is growing in Highland and the Ford Plant land

is being developed. This is NOT the place for a bike lane. Finn would work great, or Albert. Fairview and the River Road are literally just blocks away and there are already bike lanes there.

I'm also not in support of bullying the businesses along Cleveland. These are businesses that I frequent, that clients who are more elderly frequent, and that I believe we need to have in our community to be successful and vibrant. I do not want them forced out, or losing business. Additionally, what sense does it make to run the bike lane down Cleveland only to stop at Randolph to have it stop there?

Lastly, I'm extremely frustrated that this kind of project was put in motion and is barreling through without prior input from those of us who live here. This is NOT how democracy is supposed to work. If you want smart, well educated, community invested individuals living in these St. Paul communities you need to listen to us, and not force us out. I'm concerned that my voice will not be heard because this plan is already a "done-deal." Those who attended the Nativity meeting felt as though that was not a meeting to hear concerns but to just inform us of what will happen. If that's the case--shame on you!

I'm unable to attend the City Council Meeting on June 17th. I'm wondering why it was put on the agenda for 5:30--is that so the fewest citizens would actually be able attend? Please consider this email letter what I would voice had I been able to attend the meeting on Wednesday.

Thank you for listening and considering our point of view,  
Rachael, Jon, Mario and Simon Huyck

**Subject:** Against Cleveland Avenue bike lanes!

Please do not do this! Small businesses are already having a hard time staying open, taking the street parking away from them could be the last straw for some.

Also, there are many other parallel residential streets with far less traffic...ideal for bikers. As a frequent shopper in Highland Park, I request that you stop this ridiculous proposal. Bike lanes on Cleveland will be dangerous and detrimental to a special area of Minnesota!

Thank you,  
Betsy Miller

**Subject:** plan for Cleveland Ave bike lane

Councilmember Tolbert,

Thank you for your work for the city of Saint Paul, and your consideration in making all forms of transportation here more safe and equitable.

As a recreational bicyclist, I appreciate steps being taken to look at ways to make roads safe for both cars and bicycles together. When I heard about the proposed plan for the stretch between Randolph and Grand on Cleveland Ave, I immediately felt concern for how narrow the car lanes already are on Cleveland. With wider lanes and an established bike lane close by on Fairview Ave, and another close established bike lane and a bike path off-road along the Mississippi river, this proposed Cleveland Ave bike lane from Grand to Randolph seems like a superfluous move, and an unsafe one at that. Who will be served by this bike lane? Running such a short distance (only Randolph to Grand) seems like a change that might encourage a few college students to bike between Saint Thomas and Saint Catherine's, but that can't be a huge number of people on a daily basis. Bicycle commuters and those who bike for fitness will want a longer stretch of north-south roadway, which is easily found closeby along the River Road and on Fairview; again, with safer space available for both cars and bicyclists. Is there some kind of quota that cities are supposed to meet for increasing bike lane availability? This tiny stretch of proposed bike path seems like a quick bandaid fix for some reason, as though this is an attempt to pacify some group or some regulation. I foresee this plan increasing traffic congestion, confusion, and injury; not alleviating it in any way. For the good of people who live in this area, as well as for those who are just passing through, this plan does not make sense.

This email is being written so I can go on record opposing the proposed bicycle lane running from Randolph to Grand Ave on Cleveland Ave in Saint Paul.

Again, thank you for the work you do for our city, and for taking the time to read my concern.

**Subject:** Cleveland Biking

Chris,

This letter is in regard to the proposal to remove parking rights for small businesses along Cleveland Avenue in favor of bicyclists.

Our country's lifestyle is extremely biased toward fast/hassle free convenience and business must provide it or they will struggle and/or perish.

The long established businesses along Cleveland need convenient parking to survive.

We all know that Ramsey/St Paul loves to tax, and business are their beholden target of love. Why do you want to punish these business in favor of seasonal bicycles who are not even required to pay a license fee?

Bicycles can easily, conveniently, move to quieter streets parallel to Cleveland which are inherently safer and parking would not need to be adjusted.

We do not need a bike 'route' up Cleveland, riders will find their way north or south without a designated route.

I know there is a faction that wants to show the city is bike friendly and has dedicated roads, that's fine, but narrow, busy Cleveland is not the avenue to use.

As a government officer you should not cripple the hand that feeds you.

**Subject:** Cleveland Ave. parking / bike lanes

Dear Councilmember Tolbert,

I'm **opposed** to removing the parking on Cleveland between Grand and Rudolph (to add bike lanes).

I'm a long-time resident of the area, and a bike-rider — but there are plenty of bike lanes nearby, and businesses and customers of the businesses on Cleveland need the parking space. It would be a terrible thing for the neighborhood if some of the small businesses in the area had to close.

**So I hope you vote "no" on the proposal.**

Thank you,  
Sandra Menssen  
xxxx Grand Ave.  
St. Paul, MN 55105

Phone message from Shelley Jensen, xxxx Randolph She is with Tolbert on his vote on Cleveland. She believes that the City shouldn't do anything that takes away parking in the neighborhood.

It is a good idea to put it on Finn.

She does not agree with the proposal to put it on Prior for 3 reasons:

- 1) There are bump outs on Prior.
- 2) Nativity School is there and they have lots of school buses and kids.
- 3) It is too close to other bike paths.

She wanted to emphasize that it should not go on Prior.

Tibor Gallo called in opposition to the Cleveland bike lane. He believes bike lanes are very important, but because it would limit access to Cleveland Ave businesses, and can't support it. He's elderly now and can't ride a bike – he avoids the Midway area because of the light rail/congestion that's caused. He did make it to the book store at the corner of Snelling and University but ended up parking blocks away and it was difficult. He lives in Ward 3, and again wants you to know he supports bike lanes, just not the one on Cleveland.

**PROPOSED CLEVELAND AVENUE BIKE LANES PETITION**

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

I swear (or affirm) that I know the contents and purpose of this petition and that I signed this petition only once and of my own free will.

All information must be filled in by person(s) signing the petition unless disability prevents the person(s) from doing so.

### PROPOSED CLEVELAND AVENUE BIKE LANES PETITION

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

I swear (or affirm) that I know the contents and purpose of this petition and that I signed this petition only once and of my own free will.

All information must be filled in by person(s) signing the petition unless disability prevents the person(s) from doing so.

**PROPOSED CLEVELAND AVENUE BIKE LANES PETITION**

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

I swear (or affirm) that I know the contents and purpose of this petition and that I signed this petition only once and of my own free will.

All information must be filled in by person(s) signing the petition unless disability prevents the person(s) from doing so.

PROPOSED CLEVELAND AVENUE BIKE LANES PETITION

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

I swear (or affirm) that I know the contents and purpose of this petition and that I signed this petition only once and of my own free will.

All information must be filled in by person(s) signing the petition unless disability prevents the person(s) from doing so.

**PROPOSED CLEVELAND AVENUE BIKE LANES PETITION**

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

I swear (or affirm) that I know the contents and purpose of this petition and that I signed this petition only once and of my own free will.

All information must be filled in by person(s) signing the petition unless disability prevents the person(s) from doing so.

**PROPOSED CLEVELAND AVENUE BIKE LANES PETITION**

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

I swear (or affirm) that I know the contents and purpose of this petition and that I signed this petition only once and of my own free will.

All information must be filled in by person(s) signing the petition unless disability prevents the person(s) from doing so.

**PROPOSED CLEVELAND AVENUE BIKE LANES PETITION**

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

**PROPOSED CLEVELAND AVENUE BIKE LANES PETITION**

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

I swear (or affirm) that I know the contents and purpose of this petition and that I signed this petition only once and of my own free will.

All information must be filled in by person(s) signing the petition unless disability prevents the person(s) from doing so.

### PROPOSED CLEVELAND AVENUE BIKE LANES PETITION

WHEREAS, the Public Works Department of the City of St. Paul has proposed a plan to eliminate parking along both sides of Cleveland Avenue from Grand Avenue to Randolph, except for existing parking bays, and replace the parking with bike lanes.

With the surrounding side streets subject to permit parking, this plan leaves the people who live, work, shop and worship along Cleveland Avenue with no safe alternative place to park their vehicles.

The undersigned hereby request that the St. Paul City Council reject the present plan and require the Public Works Department to prepare a new plan which provides the homeowners, businesses and houses of worship located along Cleveland Avenue with safe and convenient parking.

I swear (or affirm) that I know the contents and purpose of this petition and that I signed this petition only once and of my own free will.

All information must be filled in by person(s) signing the petition unless disability prevents the person(s) from doing so.

Dear Council Member Tolbert,

I am a:

> 42+ year resident of Macalester Groveland

>> 26+ year commuter user of Cleveland Ave to Shoreview (via Transfer Road, Pierce Butler & Snelling)

>>> 10+ year Representative of Grid 9 (Cleveland-Cretin, Randolph-St. Clair) of Macalester/Groveland Community Council

**I strongly support your efforts to delay implementation of dedicated bike lanes on Cleveland Avenue (a minor bikeway per the Bike Plan) with just a mill and overlay as it is not appropriate at this time.**

I find support lacking from:

> owners/residents of 64 houses (addresses xx or xxx Cleveland) whose primary on-street parking is Cleveland Avenue

>> a house of worship whose members ability to attend services will be impacted by parking elimination on Cleveland Avenue

>>> small businesses (especially a Child Day Care Center whose Cleveland Ave address and fenced playground offer the best alternative for drop off/pickup of children is Cleveland Avenue, an older business building whose MAJOR parking is Cleveland Avenue and other businesses who report on-going challenges with parking and their operations)

>>>> non-Cleveland Avenue owners/residents whose streets abut Cleveland and concerns about the impact of their on-street parking should parking be eliminated on Cleveland between Randolph and Summit.

>>>>> My fellow MGCC Grid 2 Representative (St. Clair to Summit) - his and my Grids represent the majority of residential Cleveland addresses impacted by the proposed parking elimination.

I strongly support your proposed delay of Cleveland Avenue Bike Lanes because:

> when I voted to support the Bike Plan at MGCC Directors meeting, I was assured that implementation of Cleveland Avenue would only take place AFTER rigorous and extensive public discussion with those impacted would take place...I believe that has NOT taken place and alternatives have not been adequately explored

>> of the need to have a 'full review' of the Minor Bikeway of Cleveland Avenue from Ford Parkway to University Avenue to ensure that the safest, most desirable route for all bikers (power users, recreational, commuter, family) is implemented. The current route is predominated by a narrow street built decades/a century ago and crosses 5 sets of railroad tracks (not counting the Green Line) at the University end. Review of the other Minor Bikeway, Prior Avenue, that runs north of Summit to Pierce Butler - its implementation included bike lanes where the street was wide enough (or re-built) or shared riding where the street was narrow may be helpful.

I have attached 2 files (Grid 2 & Grid 9) that provide a visual of the number of residences and other structures on the west side of Cleveland from Randolph to Summit....please scroll down to Page 2 of each for viewing.

Thanks for your support of a SAFE multi-modal transit City.  
-Leo

Saint Paul, MN 55102

June 10, 2015

Dear Councilman Tolbert,

I am writing regarding the question of removing parking on most of Cleveland Avenue and replacing it with a bicycle lane. My home and my practice are within the Macalester Groveland/Highland Park neighborhoods, and this proposal concerns me very much. The limited amount of parking in that area will be drawn into the neighborhoods – having a tremendous impact on homes in the area, as well as the ability of local small businesses to survive.

St. Paul has always been marked by long-lasting, locally owned small businesses. Frankly, I don't think we can afford to lose any more of them, and while I'm supportive of bicycle lanes throughout the city, it has to be balanced with the needs of the community in other ways. For this reason, I strongly oppose this proposal, and hope that you will work against using the parking space for a bicycle lane to preserve these businesses, and limit the impact on our neighborhoods.

If I can provide any additional information, please feel free to call on me.

Sincerely,
