WHEREAS, the Zoning Committee of the Planning Commission, on March 6, 2003, held a public hearing at which all persons present were given an opportunity to be heard pursuant to said application in accordance with the requirements of §64.300 of the Saint Paul Legislative Code; and

WHEREAS, the Saint Paul Planning Commission, based on the evidence presented to its Zoning Committee at the public hearing as substantially reflected in the minutes, made the following findings of fact:

1. The applicant proposes to improve the Highland Golf Course. To achieve a better facility, relocation of existing wetlands is necessary. The wetlands were created by failures in the existing tile drainage system that was installed decades ago. The plan will not only increase the wetland area more than two times, but will also add new ponds to increase water retention after rainfall, thereby slowing water flow into the storm water system off-site. The proposed changes will occur during 2003.
2. The Capitol Area Watershed District reviewed and commented on the plan. The proposed changes appear to be consistent with the goals of the Watershed District.
3. Section 68.200 of the zoning code requires the zoning administrator to determine whether plans to drain or fill wetlands are exempt from the requirements to replace
