

Dear Councilmembers,

I live in Ward 3 and am writing to express my support for the recommendation to install bike lanes on Cleveland from Highland Parkway to University Avenue. It has been a long road and I appreciate that you have allowed the neighborhood to take the time to thoroughly consider this idea through numerous processes. I do hope going forward that these early projects show our neighbors that bikes and cars can get along on our neighborhood arterials and that we continue to move forward implementing the bike plan with reasonable, effective process. I also encourage you to continue to look for opportunities to build protected bikeways that will appeal to all users. Our children and our children's children with thank us for our foresight to create a city where people can move around safely without burning fossil fuels. Warmest regards, Gena
