

REPORTS ON THE FINANCIAL OPERATIONS OF THE SAINT PAUL REGIONAL WATER SERVICES
FOR THE MONTH OF

JANUARY

TO THE BOARD OF WATER COMMISSIONERS

FINANCING INFORMATION TOOL – PROBE CUMULATIVE YEAR TO DATE

This report indicates the annual amount budgeted and the accumulated revenues billed plus amounts received in cash (if the item was not billed and thereby already included in revenue) for each fully qualified account code.

The variance indicated is the amount over or (short) of the annual budgeted revenues amount.

GL DEPARTMENTAL ACCOUNT SUMMARY

CUMULATIVE YEAR TO DATE

This report indicates the annual amount budgeted, the accumulated expenditures, and the amount available for each fully qualified account code.

The 1st column is the original adopted spending budget as amended by the General Manager.

The 2nd column contains the amount expended by the Utility. Expended means the amount actually paid or entered in the INFOR system as a bill to be paid. It does not include any amounts for planned purchases such as encumbrances. It does not include any amounts for requisitions entered into the INFOR system. Expended does not mean expense. For example, we may have received delivery, accepted and paid for 5000 feet of pipe and put it into inventory. The accounting result is to have exchanged one asset (cash) for another asset (pipe) that would be carried in our supplies inventory. When the pipe is taken out of the supplies inventory and put into the ground to repair a leak the cost of the pipe would be removed from inventory and charged to the expended amounts as a true expense. If some of the pipe is then taken out of the supplies inventory and put into a new main or a replacement main, the item is capitalized with the other costs of the project, and placed into the fixed assets inventory as a main. Thus, this particular pipe never becomes an expended amount, as it is just an asset (supplies inventory) for asset (fixed asset – mains) exchange. At the end of the year when all the accounting records are compiled and entered into the INFOR system, the expended column will finally reflect the true expenses of the utility.

The 3rd column is the available funds that have not yet been expended. A manager, to determine where he is financially at this point, must subtract from available the amounts that he has requisitioned and not received and entered a bill into INFOR for, the amounts on P.O.'s for which a bill has not been entered into INFOR and the amounts he has ordered from other city departments but has not yet received an interdepartmental invoice.

Graphs

PRODUCTION - CONSUMPTION - REVENUE

SAINT PAUL REGIONAL WATER SERVICES YEAR TO DATE PRODUCTION

This graph represents total cumulative year to date pumping through the McCarron's pumping station.

SAINT PAUL REGIONAL WATER SERVICES PRODUCTION BY MONTH

This graph represents total pumping through the McCarron's pumping station.

SAINT PAUL REGIONAL WATER SERVICES YEAR TO DATE CONSUMPTION

This graph represents total fixed meter year to date consumption for all retail and wholesale accounts. Very minor amounts of consumption are charged for in other ways such as through hydrant permits, etc.

SAINT PAUL REGIONAL WATER SERVICES CONSUMPTION BY MONTH

This graph represents total fixed meter consumption for all retail and wholesale accounts. Very minor amounts of consumption are charged for in other ways such as through hydrant permits, etc.

SAINT PAUL REGIONAL WATER SERVICES YEAR TO DATE REVENUE

This graph represents the accumulation to date of all fixed meter and minimum billings issued.

SAINT PAUL REGIONAL WATER SERVICES REVENUE BY MONTH

This graph represents all fixed meter and minimum billings issued.
