1. **11 HEATING FACILITIES:** Every residential building or residential portion of a building shall have heating facilities that are properly installed, safely maintained and in good working condition, and capable of safely and adequately heating all habitable rooms, bathrooms and toilet rooms located therein to a temperature of at least sixty-eight (68) degrees Fahrenheit. Installation, repair or alteration of heating facilities, space heaters and water heating facilities shall be in accordance with the Legislative Code, Chapter 33, and the state mechanical code. Every space heating, cooking and water heating device located in a structure shall be properly installed, connected, maintained and capable of performing the function for which it was designed in accordance with the provisions of the plumbing and mechanical codes. **IMMEDIATELY DISCONTINUE USE OF THE WOOD BURNING STOVE. INSTALLATION OF ANY HEATING UNIT REQUIRES A PERMIT TO INSURE PROPER INSTALLATION AND SAFETY. You are hereby notified to correct these deficiencies in accordance with the appropriate codes. **WARNING:** Code inspection and enforcement trips cost the taxpayers money. If the violations are not corrected within the time period required in this notice, the city's costs in conducting a reinspection for compliance after the due date will be collected from the owner rather than being paid for by the taxpayers of the City. If additional new violations are discovered within the next following 12 months, the city's costs in conducting additional inspections at this same location within said 12 months will be collected from the owner rather than being paid for by the taxpayers of the City. Any such future costs will be collected via assessment against the real property and are in addition to any other fines or assessments which may be levied against you and your property.
