More than 30 minutes	1,765 27.9%	35,071 26.7%

**NOTES ABOUT THE DATA**

Data throughout these profiles come from three sources produced by the U.S. Census Bureau:

2008-2012 American Community Survey (all data unless otherwise noted).

2012 Local Employment Dynamics data from OnTheMap (DATA FORTHCOMING - employment of residents, and local jobs and their characteristics).

2010 Decennial Census (used only to derive population and household weights for 2008-2012 American Community Survey data).

Data from the 2008-2012 American Community Survey were collected by surveys over those five years, and therefore describe the average characteristics for the 5-year time period. These data have been adjusted to fit current neighborhood boundaries using the 2010 Census counts for population and housing to provide the best estimate of how many people or housing units relate to each characteristic. All dollar amounts are shown in 2012 dollars. Percentages may not sum to 100 percent due to rounding.

*suppressed* indicates that data were suppressed. Data have been suppressed when there were fewer than 10 people or units in a category, the error margins were greater than ±10 percentage points, or the error margins were greater than 70% of the estimate of a numeric value (such as median income). Large error margins occur when too few people or households were in the survey sample, making the data unreliable. If data have been suppressed at a neighborhood level, they are often available at a higher level of geography (community or city level).

The neighborhood profiles, developed in partnership with the McKnight Foundation, are part of Minnesota Compass, a project that provides measures of well-being at the state, region, county, city, and select neighborhood levels. Minnesota Compass is led by Wilder Research and funded by a collaborative of foundations. Published August 2014.
