

Exhibit A

Vacation of the air rights crossing Brewster Street for the installation of a skyway connecting the two sections of Hmong College Prep Academy (hereafter called HCPA) at 1515 and 1516 Brewster Street to the north and south. Skyway is proposed to be located, on the north side, 596 feet from the west property line to the west side of the skyway where it reaches the property line north of Brewster Street and is 13.5 feet wide. The skyway would angle at 8.5 degrees off north and runs 62 feet to the HCPA property line south of Brewster. Where it crosses the south property line, the skyway is 604 feet off the westernmost property line and remains 13.5 feet wide. The skyway is located at elevation 920 to the underside of the skyway, which is above the street elevation of 902.57 at the midpoint (17'-6"). The skyway is 17'-5" tall, so the top of the skyway is at 937.42.
