Pin#: 262923430027

Record # 04-3853

The City of Saint Paul is conducting a program for the control of tree related nuisances. It is necessary to locate and eliminate all of the dangerous trees, and all sources of Dutch Elm disease and Oak Wilt disease, including stumps or woodpiles that contain elmwood or diseased red oak with the bark attached. The city has the authority, on both public and private property, to require removal, disposal or management of diseased trees, dangerous trees and any materials that contribute to the spread of disease within the City of Saint Paul and to order the abatement of such nuisance.

Listed below is the address where the nuisance exists, the size and the location of the tree(s), stump(s), log(s), or brush which need to be taken care of by the property owner. Failure to take care of the problem will make it necessary for the city to take the necessary actions to affect the removal of the marked trees, brush and separate the bark from the marked stumps and remaining wood and bill the property owner for all costs associated with removal of the nuisance under **Chapter 175 of the Saint Paul Legislative Code**. See page two (2) for details.

Location 771 Pierce Butler Route - 28" diameter tree located in backyard alongside the garage.

- Said elm trees are dead (with tight bark), dying or infected with **Dutch Elm Disease** fungus. Trees must be removed and all stumps, wood and brush with tight bark must be recycled, chipped, burned, buried or the bark removed from all exposed wood, within one month.
- Said oak trees have been identified as having **Oak Wilt Disease**. Trees must be removed and all stumps, wood and brush with tight bark, must be chipped, burned, buried or the bark removed from all exposed wood within one month.
- Elm** logs, stumps or piles of cut elm wood or brush must be stripped of all bark or destroyed within one month, because they serve as a breeding place for the elm bark beetles which aid in the spread of dutch elm disease.
- Red** oak logs, stumps or piles of cut red oak wood or brush from oak wilt infected trees must be stripped of all bark or destroyed within one month, because they serve as a breeding place for the oak wilt fungi which contributes to the spread of oak wilt disease.
- Dangerous Trees** must be: __cut down,__ trimmed,__ bolted and cabled or __removed within one month, in order to comply with the **City Ordinance** and the protection of all people and property in Saint Paul.
