to me

The purpose of the drain installation was to prevent hazardous ice forming on the sidewalk in front of the vacant Lot during the winter. There seem to be some spring on the Lot...some though it to from the water utility did not confirm. No other work is planned for the Lot. If you are interested in the Lot for side yard, let me know.

to Tchu

Hi Tchu,

Did the water that is there suddenly appear? We are still trying to piece the history of the property together. In regard to our interest in the lot, would we be able to build on it?

Thanks,

Jim and Jennifer

It seems there had always been a water issue...even when there was a house there, before we got the lot. The lot would only be used for side yard. If you would like to purchase it and build on it to build might be too much, due to the water issue.
