- 2x JBL V X915S 15" High Power Flying Subwoofers
  - Driver & Passenger Side
  - Powered by 1 Crown Macro-Tech 12000i Amplifier

**11. Describe the steps that will be taken to minimize the noise levels**

As the organizer of LuckyPalooza for the last two years, Visit Saint Paul is very cognizant of the neighbors near the event location including those in Irvine Park and Irvine Park Towers as well as residents on Chestnut Street behind Cossetta's. We will utilize a decibel reader and do readings throughout the day and evening. Production crews will have decibel readers to ensure they are staying below the agreed upon decibel levels. As the organization with the name on the sound variance for the full event, Visit Saint Paul will be sure all entities are aware of sound level restrictions.

**12. Briefly state reason for seeking variance:**

Saint Paul has a rich Irish heritage and history of celebrating St. Patrick's Day. LuckyPalooza was developed to kickoff St. Patrick's Day week and to show the Twin Cities and the region how Saint Paul celebrates like no where else in the country! We are seeking the variance to play music from five locations (three outdoors, two in a tent from 2-11pm and then two in the tents until 1am.) This is a safe and secure event highlighted by 6500 free rides redeemed last year from Metro Transit and only one arrest. We are seeking the sound variance so the event can go into the evening past 10:30pm as most large outdoor festivals and events do.

**13. Attach site diagram showing location of noise source(s), streets, stages, tents, etc. (If there will be amplified sound, indicate location and direction that all speakers will be facing.)**
