25 to 50 miles			<i>suppressed</i>	1,472
Greater than 50 miles			<i>suppressed</i>	3,223

NOTES ABOUT THE DATA

Data throughout these profiles come from four sources, the first three of which are produced by the U.S. Census Bureau:

2010-2014 American Community Survey (all data unless otherwise noted).

2013 2nd Quarter Longitudinal Employer-Household Dynamics data from OnTheMap.

2010 Decennial Census (used only to derive population and household weights for 2010-2014 American Community Survey data).

Excensus LLC, ("Detailed Housing and Demographic Profiles - Twin Cities Metropolitan Area", 2010).

Data from the 2010-2014 American Community Survey were collected by surveys over those five years, and therefore describe the average characteristics for the 5-year time period. These data have been adjusted to fit current neighborhood boundaries using the 2010 Census counts for population and housing to provide the best estimate of how many people or housing units relate to each characteristic. Median calculations provided represent weighted averages of census tract medians with the weighting based on the percent that each census tract represents of the selection area whole. All dollar amounts are shown in 2013 dollars. Percentages may not sum to 100 percent due to rounding.

suppressed indicates that data were suppressed. Data have been suppressed when there were fewer than 10 people or units in a category, the percentage estimate is less than 1%, or the error margins were greater than 70% of the estimate of a numeric value (such as median income). Large error margins occur when too few people or households were in the survey sample, making the data unreliable. If data have been suppressed at a neighborhood level, they are often available at a higher level of geography (community or city level).
