

January 7, 2018

Dear City Revenue Officials,

Enclosed is our check for the sealcoating that was done this past summer.

I again want to file a complaint regarding the way our alley was done. (I have called once and spoken to crew supervisors since.) Previously, the water would run down the slope (west to east) of the alley to the gutter on Frank. The work done this summer created a blockage to the flow of the alley water, which now forms a large pool in the alley right beside our driveway. When it rains there ~~are~~ is a large amount of water remaining in the alley and now in freezing weather it is a pond of ice! Please deal with this problem next summer.

Thank you! Fred Thoni 1113 Hawthorne Ave E.
