Subject: Appeal of Fire Inspection Correction Notice

Dear Members of the Department of Legislative Appeals,

I am writing on behalf of Frattallone's Hardware and Garden to formally appeal the deficiency cited in the recent Fire Inspection Correction Notice regarding our aisle width requirements. This is the first item on the attached deficiency list, cited as MSFC 1104.23, 1018.1. Specifically, the notice states that our aisles must maintain a minimum width of 42 inches.

The base width of our aisles do meet this requirement. However, the inspector noted that in a few places, the overhead racking system slightly decreased the width of the aisle. Since our store's opening in 2017, our current aisle configuration has been consistently approved in multiple fire inspections without any prior citations or concerns.

Unfortunately, widening the aisles would require removing one of our six aisles, which would result in approximately 16% of our total product being removed. Alternatively, we could remove the multi-rack shelving that stores our overstock above regular inventory. Removing this shelving would leave us without a designated space for overstock, which would have a significant negative impact on store operations.

Given these substantial operational challenges, we respectfully request a variance to maintain our current aisle configuration. We are open to discussing potential solutions and safety measures with the hearing officer to ensure compliance while minimizing disruption to our business. We appreciate your time and consideration of this appeal and look forward to the opportunity to present our case.

Please let us know the next steps regarding the hearing process and any additional documentation or information required.

Thank you for your time and attention to this matter.

Sincerely,

Mike Frattallone
