

The more I've learned about the choices available for our Lowertown community. , Thus, I, as a downtown resident, favor optimizing the site with year-round activities. and ample parking. This will protect the character of Lowertown, unique, traditional vs teardown and build new. We should re-cycle our assets, not replace them.

I welcome the potential for increased revenues and visitors to Lowertown. But the current residents need and want nearby parking

These features are priorities of St.Paul residents. and they supercede any pre-set timelines.

If not adopted, this development deserves more discussion and transparency.
