Restrictions thru 5/19. Retired 5/12/2016 | Open   |
| 16-0014      | 3/31/2016      | Business     | Meter Tech           | 3/31/2016     | Employee was at 297 Otis Ave and went to turn on the stop and it slipped off and heard his shoulder pop and then found out stop was backwards.                                                                                                        | Right Shoulder     | 1         | 28              | Yes        | Injury   | No                 | Employee went to HP Clinic 4/1/16 (missed work) and Dr gave lifting rescritions for 2 weeks. Concern for Right shoulder rotator cuff tear. Employee went back 4/14/16 and was given rescritions for 2 weeks of No lifting over 50 lbs. Cleared on 4/29/2016                                                                                                                               | Open   |
| 16-0015      | 3/30/2016      | Production   | WUWI                 | 3/30/2016     | Employee was in dump truck at Pig's eye recycle facility and bumped his elbow on door of truck while dumping the load of brush and logs.                                                                                                              | Elbow              | 0         | 0               | Yes        | Injury   | No                 | Employee went to the doctor on 4/18- had his elbow drained- No restrictions but needed to wear ACE wrap for a few weeks.                                                                                                                                                                                                                                                                  | Closed |
| 16-0016      | 2/3/2016       | Business     | Customer Service Rep | 4/6/2016      | Employee gets a numb tingling feeling in her right arm and sometimes pain in thumb when keyboarding and holding a pen to write. Had a EMG test on 2/3/16 and it states that she has carpal tunnel.                                                    | Right Arm          | 0         | 0               | No         | Injury   | No                 | True visited a doctor and was told that this was Not work related. Customer service has had her workstation evaluated and has got her a new keyboard and mouse to try and accommodate her.                                                                                                                                                                                                | Open   |
